# Foreword

## Joint Strategic Needs Assessment 2008

From Nick Bye,  
Chair of Torbay  
Strategic Partnership

**I am delighted that, together with the Torbay Public Health team and i-Bay, we have developed a report that provides a comprehensive picture of the differences in need across the population of Torbay.**

This second Joint Strategic Needs Assessment (JSNA) takes us to a new level in analysing and understanding the complex factors that will help us to improve the lives of local people and reduce current inequalities.

This year the JSNA has been based on the Community Plan, drawn up by the Torbay Strategic Partnership (TSP), which outlines the Partnership's vision for Torbay over the next 20 years. The views of residents and representatives of the business, community and voluntary sectors all contributed to the Community Plan.

The vision is directed by four key themes; Pride in the Bay, Stronger Communities, Learning and Skills for the Future and, underpinning it all, the New Economy. With economic prosperity at the heart of the plan leading towards community prosperity.

There is a strong relationship between improved health and well-being and employment. Our combined focus is on boosting economic prosperity, consistent with a higher quality of life and better access to jobs, based on the promotion of our skills base and a 'can do' entrepreneurial culture that is open to new ideas and seeks out all investment opportunities.

The JSNA will provide a solid base from which we can tackle the challenges ahead and action a wide range of measures to improve our local community. It has never been more important that we meet these challenges together across the Torbay Strategic Partnership. The current recession is biting in Torbay and affecting local people. Our collective resolve and efforts must be based on a creative, cohesive and concerted response. But it must start with an excellent overview of people's needs and circumstances. This JSNA provides us with the right information at exactly the right time.

A handwritten signature in blue ink, appearing to read 'N. D. Bye'.

### The 2008 Joint Strategic Needs Assessment for Torbay sets out to:

- Highlight differences in need across Torbay.
- Provide a reference source for TSP members for future commissioning activities, for reporting and applications for funding.
- Aid better decision-making.
- Support the delivery of improved outcomes for the local community.
- Influence the choice of future Local Area Agreements (LAAs).

## Setting the Scene for Torbay

Balloon on Torquay seafront

**Torbay has a rich, diverse and proud heritage spanning many thousands of years. Torbay became a popular holiday destination early in the 19th Century, famed for its romantic quality, its balmy air and perfect environment for relaxation and convalescence.**

It was the Victorians that coined the phrase the 'English Riviera', likening the area to its French equivalent. Sub-tropical plants and the celebrated Torbay Palm, flourishing within the special microclimate, add to the Mediterranean feel, and these days the busy waterfronts are a hive of activity catering for both working and pleasure craft.

Winters are generally mild and short, giving way to the flower-filled warmth of an early spring. Summer really does seem to linger, with October and November very often mild enough to enjoy outdoor activities.

The three Riviera towns of Brixham, Paignton and Torquay surround the natural, sheltered Bay which, with a south-easterly aspect, forms an ideal suntrap and boasts many Blue Flag beaches.

In September 2007, Torbay became the 32nd member of the European Geoparks Network (EGN). Torbay had been working on its English Riviera Geopark application since 2003. It was able to demonstrate that it uses its geological heritage and its wider cultural heritage in its community and educational development framework. It also uses this heritage to promote and attract tourists to the area.

The Geopark is an important component in all the strategic plans for the economic regeneration of Torbay, rich and well-exposed geological heritage, from Devonian reefs to Pleistocene bone-caves. This geology has strong links to the history of the science and culture, not least as Torbay includes sites crucial to the initial characterisation of the Devonian Period.

The area includes one of the highest concentrations of protected geological sites in the UK with 11 nationally protected sites (SSSIs) and 15 regionally important sites (RIGS).

Torbay has the romance of a seaside town, sandy beaches and above-average warm weather. With these attractions, Torbay, of course, has been a popular retirement destination for many years.

# Background to the Joint Strategic Needs Assessment

**The Local Government and Public Involvement in Health Act (2007) requires Primary Care Trusts (PCTs) and Local Authorities to produce a Joint Strategic Needs Assessment (JSNA) of the health and well-being of their local community.**

The needs assessment is a systematic method for reviewing the health and well-being needs of a population, leading to agreed commissioning priorities that will improve the health and well-being outcomes and reduce inequalities. A JSNA is not a needs assessment of an individual, but a strategic overview of the local community need - either geographically such as local authority / ward or specific groups such as younger or older people or people from black and minority ethnic communities.

The JSNA allows local partners to identify common priorities (for particular groups, services and wards) and to determine an evidence-based approach on how best to work together to meet those needs - whether through joint commissioning, joint provision or other approaches - and measure by achievement of joint targets (Local Area Agreements - LAAs). A JSNA will:

- Define achievable improvements in health and well-being outcomes for the local community.
- Send signals to existing and potential providers of services about potential service change.
- Support the delivery of better health and well-being outcomes for the local community.
- Inform the next stages of the commissioning cycle.
- Aid better decision-making.
- Underpin the LAA and the choice of local outcomes and targets, as well as local commissioning plans.

This JSNA then represents a single document that essentially guides the commissioning process to improve the health and well-being of the local population and to reduce the overall inequalities in the population currently found in Torbay.

## What benefits are there from last year's JSNA?

Last year's JSNA highlighted the issues Torbay faces with regard to our higher-than-average elderly population and recognised the implications for service development. It also warned of the negative impacts for the future of current levels of risk-taking behaviours and explained the differences in outcomes experienced by our more deprived wards.

It established the need to invest in health services to address the specific needs of our local population and additional funding was secured to do this. It also started the debate on inequalities within Torbay which led to the 'Closing the Gap' project and the proposal to focus additional investment towards deprived areas.

## What we hope to achieve from this JSNA

This JSNA should form a reference document for commissioners across all public service agencies, providing them with the evidence needed to agree and shape service delivery across Torbay. It should be possible to import sections of this report into funding applications and reports.

Commissioners should use the JSNA to identify where Torbay overall is very different to the national average, which inequalities are of particular note and where they exist. Commissioners will then be better able to focus on those areas where the need to narrow the inequalities gap is greatest.

Oldway Mansion

## Approach to the 2008 JSNA for Torbay

**The 2007 JSNA was completed in partnership between Torbay Council and Torbay Care Trust, and was led by the Director of Public Health. Although this gave a picture of inequalities within Torbay, the process for undertaking the 2008 JSNA has become far more encompassing.**

The 2008 JSNA for Torbay has been commissioned by the Torbay Strategic Partnership for the Acting Director of Public Health to deliver. In delivering this second JSNA for Torbay, a cross-agency intelligence network called i-bay has been established (details of members and contributors to the 2008 JSNA can be viewed in Appendix 1). The intelligence network have taken the national guidance for a core dataset and increased the number of indicators to take account of the different agencies interest in the JSNA and the wider use of the document.

This partnership working has ensured maximum public sector efficiency through reduced duplication, and future pieces of work are to be planned in a similar way during the coming year.

In undertaking this piece of work, the aim was to use ward level data where possible and to achieve this, the intelligence network have shared aggregated anomalous data for the benefit of other members of the TSP. The ward level data, along with the Torbay, South West and England figures have then been analysed to highlight figures that are significantly different to the England figure. We have also sought to use the most recent date possible - especially as key data sources such as census data is increasingly out of date.

The Torbay Strategic Partnership Community Plan has been followed for the format, representing a move away from the national guidance to have a JSNA in Torbay that better reflects the aspirations of the local community plan as well as identifying inequalities.

In addition to the four community plan themes, this JSNA contains four further themes, Demography, Younger People, Older People and Vulnerable People, each one details a series of indicators relating to the theme.

Torquay harbour

# Executive Summary

**This Joint Strategic Needs Assessment has brought together members of the Torbay Strategic Partnership to identify the 'bigger picture' in terms of the economic, social, health-care and well-being inequalities that exist within Torbay. This report allows the TSP to focus on not only the issues that affect Torbay overall, compared to the national average, but also the inequalities experienced by some wards compared to others.**

This JSNA summarises a vast amount of information, and is intended as a reference tool for all members of the Torbay Strategic Partnership to assist in the commissioning process, maximising the evidence base for funding bids and strategies.

The tables that follow within this report have been specifically organised to reflect the Torbay Strategic Partnership Community Plan, and have been supported by four further tables. The tables are contained within the following sections:

## Section one - Demography

Profiling the make-up of Torbay's population, and the expected growth in population in various age and social groups.

- The average age of residents in Torbay, at 43.7 years, is higher than the national average of 39.1 years; with two wards having an average age greater than 50 years.

## Section two - Pride in the Bay

One of the cornerstones of the Community Plan aimed at creating and maintaining a quality environment, embracing culture and better transport.

- Household Waste constituted 64,596 tonnes (82%) of the Municipal Waste. 28% of household waste was recycled

or composted and 72% was land filled. On average, each household in Torbay produced 734kg of residual waste (i.e. waste that was not re-used, recycled or composted) during 2007/08.

## Section three - Learning and Skills for the Future

A strategy for creating better skills and education through a culture of lifelong learning.

- The number of children aged 5 in Torbay that achieved 78 points across the Early Years Foundation Stage with at least 6 in each of the scales of personal, social and emotional development and communication, language and literacy is above the national average of 49.0%, with 638 (50.3%) children achieving the requirements. There was a noticeable variance between the wards, with Watcombe having 33.0% and Churston with Galmpton 68.9%.

## Section four - The New Economy

Harnessing present economic strengths and building upon these, developing new opportunities and technologies.

- Torbay's economic worth was in the region of £1,622 million in 2006, or £12,178 per head of population. This measure of economic worth (GVA) is significantly lower for Torbay than the national average of £19,413 per head.

## Section five - Stronger Communities

Creating healthier and safer communities with access to good quality housing, support, education and training.

- Alcohol related admissions to hospital in 2006/07 were around 1,621 per 100,000 population in Torbay, significantly higher than the national 1,384 per 100,000.

## Section six - Younger People

Improving the health and well-being of younger people, levels of education and opportunities.

- The rate of children looked after per 10,000 is significantly higher in Torbay, at 67 per 10,000, compared to the national 54 per 10,000.

## Section seven - Older People

Improving the health and well-being, services and respect for older people.

- The proportion of Torbay's population aged 50 and over is currently 43.5%; this is projected to increase to 45.0% in 5 years time. The proportion of people aged 65 and over is projected to be just under a quarter (24.7%) of the total population in 5 years, compared to around 17% nationally.

## Section eight - Vulnerable People

Safeguarding vulnerable people and developing the services provided.

- 5,000 adults in Torbay received community care services during 2007/08 for physical disability, frailty and sensory impairment, learning disability, mental health, substance misuse and vulnerable people services. This is a rate of 4,860 per 100,000 locally compared to 3,990 nationally.

**For each of the sections**, there is a local ward level analysis, where possible, with colour-coded significance from the national average. Undertaking the analysis in this way will allow services to be targeted to the areas with the greatest need.

# Overview of Statistical Analysis Methodology for the JSNA

The analysis contained in each of the data sets has been undertaken to show where a value differs significantly from the England average, or in a couple of instances, where the ward level differs significantly from the Torbay average.

Where a significant value has been identified, a colour has then been attributed to the data. The colours used are red and green; where red indicates that a value is higher or worse than the national average and where we feel that the result could indicate a potential need or gap. Green indicates that the value is lower or better than the national average. No colouring indicates that there is no associated significance, or that the significance could not be identified.

Significantly different	Higher or worse than the national figure
Significantly different	Lower or better than the national figure
Not Significantly different	No significance or unable to identify any significance

There are some exceptions to the basic principle that red shading represents a significantly higher figure compared to the national average.

There are some indicators where a significantly lower figure can be easily judged to suggest a potential gap in services or a 'worse' position. For the indicators where this judgement has been made, the colour coding has been reversed and marked with a diamond.

For the majority of indicators, the judgement on whether a higher or lower figure is better or worse cannot be easily made and the principle of red shading representing a significantly higher result has been maintained.

An example of where indicators are red:

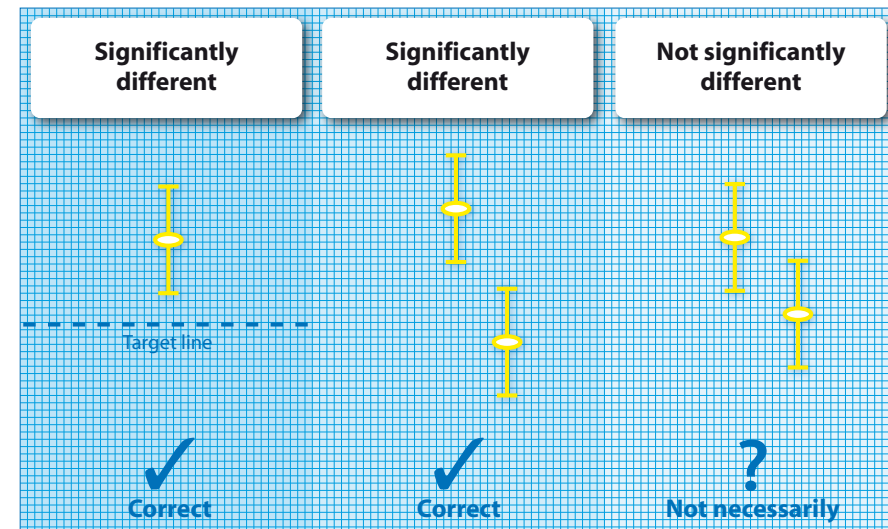

- Areas that have a significantly higher proportion of older people have been highlighted red as we would expect increased adult social care service provision in the coming years.
- Areas with a significantly lower educational attainment have been highlighted red as we would want to increase attainment.

**It should not be assumed that a red colour means that the particular indicator needs priority attention; all indicators need to be considered together against existing priorities.**

## Determining significance

In simplistic terms, a 'confidence interval' is a measure by which an estimated value may lie. Therefore confidence intervals have both 'upper' and 'lower' limits. These limits are then used to measure the precision (narrower limits) or imprecision (wider limits). An estimate with wider limits (a large confidence interval) has a greater uncertainty in it.

Comparisons are often made between two or more different estimates (see below chart) sometimes in such cases statistical testing is undertaken by comparing the confidence intervals of the estimates to see if they overlap - with non-overlapping confidence intervals being considered as statistically significantly different. This is quick and easy to do, but not necessarily conclusive. Whilst it is safe to assume that non-overlapping confidence intervals indicate a statistically significant difference, it is not always the case that overlapping confidence intervals do not.

All colour-shaded indicators have been calculated to determine appropriate levels of confidence using Professor R.G.Newcombe. Stats in Medicine 1998, 17, 873-890. Method 10, and calculates the confidence interval between two proportions based on unpaired data.

# Torbay Ward Structure

This map is based upon Ordnance Survey material with permission of Ordnance Survey on behalf of the Controller of HMS Office Crown Copyright. Unauthorised reproduction infringes Crown Copyright and may lead to prosecution or civil proceedings. Torbay Council. LA079782. 2009.

# Demography

This first section of data looks at the demography of Torbay and gives an overview of the resident population. Including the current population estimates per ward and selected age groups, as well as the projected population in five years' time.

The latest population estimate for Torbay is the 2007 Mid Year Estimate from the Office of National Statistics. The population pyramid illustrates graphically the population structure of Torbay compared to the England average.

## Our key findings

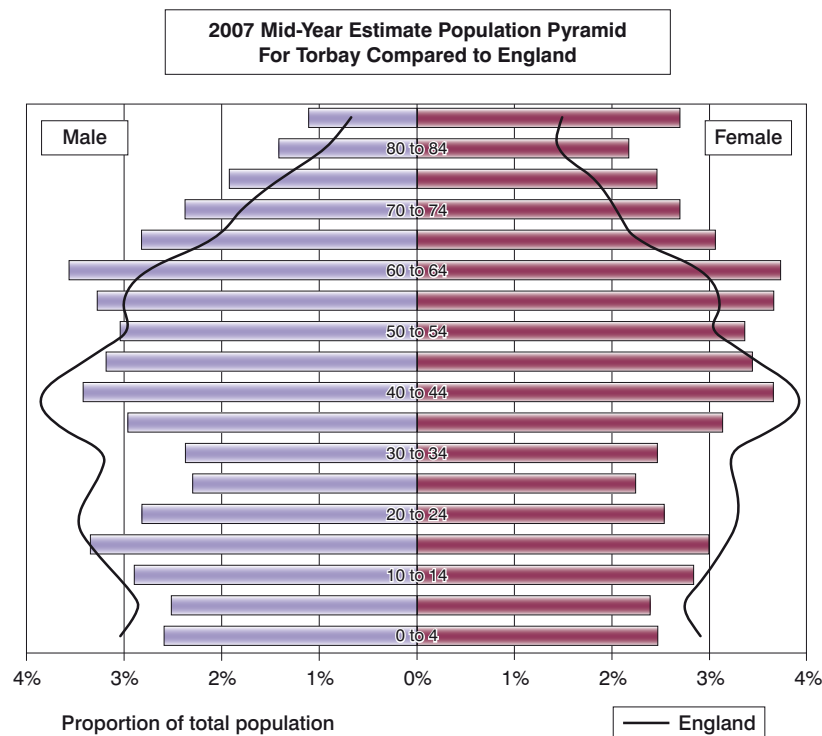

- The average age of residents in Torbay, at 43.7 years, is higher than the national average of 39.1; with two wards having an average age greater than 50 years.
- A higher average age is reflected in the older person bias within the bay, where levels of persons aged over 50 account for around 43% of the total population, this is projected to increase over the next 5 years to 45%.

- With an aging population, where female residents have a higher life expectancy, it comes as no surprise that the proportion of widows in the bay is significantly higher than the national average.
- Despite the 'palm tree' image of Torbay, there are areas of severe deprivation, with two of Torbay's electoral wards being ranked in the top 10% most deprived in England. Areas of deprivation can be viewed in the thematic maps in appendix 2.

Whilst we have identified indicators relating to the demography section, we fully acknowledge that there are limitations and gaps due to the data that is available.

## Some examples of the limitations and future developments for the demography data set

- Data from the 2001 census will not be updated until the 2011 census.
- Further work with Strategic Planners is needed to improve local population projections - guided by proposed development sites.
- Development of all age all cause mortality at ward level.
- Predictive modelling to investigate interventions and outcomes around reducing inequalities and increasing life expectancy.

## Torbay Strategic Partnership Community Plan Themes

The Community Plan outlines the vision for Torbay over the next 20 years bringing together the views of residents as well as representatives from the business, community and voluntary sectors.

### Vision and ambition for the Bay

- A prosperous area known to be a great place in which to live and learn and grow up.
- An area where we compete on a world stage in our traditional industries of tourism and fishing.
- An area where communities know and support each other and enjoy some of the best services in England.
- An area that widens opportunities and provides high quality employment and retains our young people in the Bay.
- An area that celebrates the differences in the three towns, builds on the strengths of these towns and brings back the feel-good factor.

Four key themes - Pride in the Bay, Learning and Skills for the Future, The New Economy and Stronger Communities - have been identified as making the biggest difference to the TSP ambitions.

Under each of the community plan themes are a series of indicators that try to reflect the ambitions and priorities of the theme.

With the national indicator frame set being published in April 2008, and still within their first year of reporting, there are several gaps within the data set where figures are reported annually. Therefore not all of the Local Area Agreement indicators have been included.

# Pride in the Bay

**'Pride in the Bay' is one of the cornerstones of the Community Plan - aimed at creating and maintaining a quality environment, improving the quality and quantity of culture in the Bay and making it easier to get around through better transport choices.**

This links to other areas of the 'Wheel' through regeneration and employment opportunities and the development of communities that care for each other and their environment.

## Our key findings

- Carbon Dioxide (CO<sub>2</sub>) emissions per capital (per head of population) at 5.2 tonnes are significantly lower than the national average of 8.6 tonnes.
- Findings from the 2006 general user satisfaction survey show that on the whole, residents are less satisfied with their local area as a place to live.
- Public perception was significantly higher for resident believing that rubbish and litter lying around was a very big or a fairly big problem.
- Household Waste constituted 64,596 tonnes (82%) of the Municipal Waste. 28% of household waste was recycled or composted and 72% was land filled. On average, each household in Torbay produced 734kg of residual waste (i.e. waste that was not re-used, recycled or composted) during 2007/08.

Whilst we have identified indicators relating to the pride in the bay section, we fully acknowledge that there are limitations and gaps due to the data that is available.

## Some examples of the limitations and future developments for the pride in the bay data set

- Data from the 2001 census will not be updated until the 2011 census.
- Results of the national place survey are due for publication in the spring of 2009; this would allow increased and up-to-date inclusion of resident perception data and increase the resident voice within the JSNA.
- Local level data on recycling rates, air quality, carbon emissions, cultural mix of businesses in the Bay, accessibility to public transport would all complement the JSNA.

Babbacombe beach

Brixham harbour - Golden Hind

- Area of Green space - As a proportion of all land use, 2005 National Land Use Database, ONS

# Learning and Skills for the Future

**We are aiming for better education, better skills and better prospects through promoting a culture of lifelong learning. This means:**

- Encouraging achievement, raising aspirations and promoting better links between education and training and businesses.
- Narrowing the gap between the most and least advantaged children.
- Supporting a range of lifelong learning opportunities for adults and older people.

This links to other parts of the 'Wheel' through the encouragement of innovation and entrepreneurship and addressing issues of inequality through stronger communities. Priorities focused on children and young people will be delivered through the Torbay Children and Young People's Plan.

## Our key findings

- The number of children aged 5 in Torbay that achieved 78 points across the Early Years Foundation Stage with at least 6 in each of the scales of personal, social and emotional development and communication, language and literacy is above the national average of 49.0%, with 638 (50.3%) children achieving the requirements. There was a noticeable variance between the wards, with Watcombe having 33.0% and Churston with Galmpton 68.9%.
- Overall GCSE attainment levels in Torbay for 2006/07 were lower than the national average. There were noticeable variations between the wards; with both Churston with Galmpton and Wellswood having a significantly higher proportion of pupils achieving 5+ A\* to C grades.

- Persistent absenteeism in the Bay (percentage of all enrolments) is higher than both national and regional rates; with 10 wards having significantly higher rates than the national average. There is a slightly higher rate of persistent absenteeism in female compared to males within the Bay.
- The proportion of pupils accessing free school meals in Torbay is lower than the national level; however there are 5 wards where the level is significantly higher than the national.
- The proportion of 16 to 18 year olds in Torbay who are not in education, employment or training (NEETs) is significantly lower compared to the national.

Whilst we have identified indicators relating to the learning and skills for the future section, we fully acknowledge that there are limitations and gaps due to the data that is available.

## Some examples of the limitations and future developments for the learning and skills for the future data set

- Data from the 2001 census will not be updated until the 2011 census.
- Improved estimates of the working age population and their overall qualification levels.
- Information on apprenticeships and trainees.
- Vocational training and learning.

38. All People aged 16 to 74 with - Other qualifications: Level unknown, 2001 Census, ONS

39. Rank of Education, Skills and Training Deprivation domain - Ranking of average SOA score per ward for the Index of Multiple Deprivation 2007

# The New Economy

## The new economy is one of the local community plan themes and means:

- Building on and developing our traditional industries of fishing and tourism.
- Encouraging investment and business growth in new businesses that use up-to-date technology.
- Supporting the development of other growth sectors such as cultural industries.
- Supporting the renaissance of Torbay with a strong transport infrastructure and affordable housing.

## Our key findings

- Torbay's economic worth was in the region of £1,622 million in 2006, or £12,178 per head of population. This measure of economic worth (GVA) is significantly lower for Torbay than the national average of £19,413 per head.
- There is a heavier dependence on the public sector as well as tourism, with around 68.0% of all employees being employed in these sectors. 81.2% being employed in 'distribution, hotels & restaurants', 'banks, finance & insurance' and 'public administration, education & health'.
- On the whole, earnings of both residents and workers in Torbay are significantly lower than the national, with residents earnings, on average, 25% less than the national.
- Torbay's employment market had a higher than national proportion of employees employed part-time (2001 census), in 2007/08 a third of all notified vacancies were for part-time employment, compared to 23% nationally.

- There is a distinct benefit economy within Torbay, with some areas having over 25% of the working age population claiming an out of work benefit. In early 2009, the Job Seekers Allowance claimant levels reached 4.2%, significantly higher than the 2.2% average for 2007/08. Torbay's level of Job Seekers Allowance claimants is frequently the highest in the South West region.
- Levels of personal indebtedness in the Bay are higher than the national and vary across the bay, both in terms of numbers and levels of debt. With around 2.4% of the 16+ population in the Bay having a County Court Judgement made against them.
- Overall levels of fuel poverty in the bay are higher than both the national and regional averages, with the three wards of Ellacombe, Roundham with Hyde and Tormohun having significantly higher than national levels of households in fuel poverty.
- As an illustrative guide to national indicator 153 - working age people claiming out of work benefits in the worst performing neighbourhoods (statistical geographies - not actual neighbourhoods) can be viewed on page 60.

Whilst we have identified indicators relating to the new economy section, we fully acknowledge that there are limitations and gaps due to the data that is available.

## Some examples of the limitations and future developments for the new economy data set

- Data from the 2001 census will not be updated until the 2011 census.
- Detailed local level income data.
- Volume of footfall within town centre areas.
- Further breakdown of GVA by standard Industrial Classification and ward.
- Business survival rates.
- Vacant premises.
- Local repossession statistics.
- Detailed tourism statistics.

## The New Economy notes:

Numbers / percentages may not add due to rounding

● indicates where data has been modelled from MLSOA to electoral ward

- Working age population - 2006 Mid Year Estimate, ONS
- Total Gross Value Added (GVA) (£ Million) - GVA measures the contribution to the economy of each individual producer, industry or sector - 2006 GVA data, ONS
- Gross Value Added (GVA) per head GVA £ per head - Total GVA per head of local population, 2006 GVA, ONS
- Board SIC groupings (5, 7 & 8) top three industrial groups - (Standard Industrial Classification (SIC) - G,H & J,k & L,M,N) Proportion of all employees working in Distribution, hotels, restaurants, Banking, finance, insurance and public administration, education and health. Nomis - 2007 Annual Business Inquiry
- All VAT Based Local Units - Local based units are individual site (shop, factory, etc) situated in a geographically identified place. March 2007, ONS
- VAT Based Local Units - Agriculture, Production & Construction VAT Based Local Units - proportion of aggregated SIC for All VAT based local units, March 2007, ONS
- VAT Based Local Units - Motor Trades, Wholesale & Transport - proportion of aggregated SIC for All VAT based local units, March 2007, ONS

- VAT Based Local Units - Retail - proportion of aggregated SIC for All VAT based local units, March 2007, ONS
- VAT Based Local Units - Hotels & Catering - proportion of aggregated SIC for All VAT based local units, March 2007, ONS
- VAT Based Local Units - Property & Business Services, Post & Telecommunications and Finance - proportion of aggregated SIC for All VAT based local units, March 2007, ONS
- VAT Based Local Units - Education, Health and Public Admin & Other Services - proportion of aggregated SIC for All VAT based local units, March 2007, ONS
- All VAT Based Enterprises - An enterprise is essentially a business. It is generally located at the main operating site or the head office. March 2007, ONS
- All VAT Based Enterprises - Less than 2 Years Old - proportion of enterprises by age, March 2007, ONS
- All VAT Based Enterprises - 2 to 3 Years Old - proportion of enterprises by age, March 2007, ONS
- All VAT Based Enterprises - 4 to 9 Years Old - proportion of enterprises by age, March 2007, ONS
- All VAT Based Enterprises - 10 or More Years Old - proportion of enterprises by age, March 2007, ONS

## The New Economy notes:

Numbers / percentages may not add due to rounding

● Indicates where data has been modelled from MLSOA to electoral ward

✕ Indicates that the significance has been derived from the Torbay average and NOT the national average

\* Not published due to small figures

129. CCJs With a Value; Greater Than £1000, 2005, ONS

130. Number of people seeking debt advice, 2007/08, Torbay Citizens Advice Bureau

131. Average value of debt - Loans / Credit & Store Cards, 2007/08, Torbay Citizens Advice Bureau

132. Average value of debt - Other, 2007/08, Torbay Citizens Advice Bureau

133. Average value of debt - Total, 2007/08, Torbay Citizens Advice Bureau

134. Rate of people accessing CAB debt services, 2007/08, Torbay Citizens Advice Bureau

135. Total Occupied Households, 2001 Census, ONS

136. Occupied Households in Fuel poverty – full income - this represents the official Government definition of fuel poverty. Income includes housing benefit and Income Support for Mortgage Interest Relief and Council Tax Benefit. prediction based on 2001 census, and 2003 English Housing Condition Survey, prediction based on 2001 census, and 2003 English Housing Condition Survey, [www.fuelpovertyindicator.org.uk/](http://www.fuelpovertyindicator.org.uk/)

137. Occupied Households in Fuel poverty – basic income - this model excludes incomes relating to housing benefit and Income Support for Mortgage Interest Relief and Council Tax Benefit. prediction based on 2001 census, and 2003

English Housing Condition Survey, [www.fuelpovertyindicator.org.uk/](http://www.fuelpovertyindicator.org.uk/)

138. Occupied Households in Fuel poverty – full income (equivalised) - this is similar to the full income definition, with the exception that incomes are equivalised; income is adjusted to take account of differences in household size and composition. prediction based on 2001 census, and 2003 English Housing Condition Survey, [www.fuelpovertyindicator.org.uk/](http://www.fuelpovertyindicator.org.uk/)

139. Occupied Households in Fuel poverty – basic income (equivalised) - this is similar to the basic income definition, with the exception that incomes are equivalised; income is adjusted to take account of differences in household size and composition. prediction based on 2001 census, and 2003 English Housing Condition Survey, [www.fuelpovertyindicator.org.uk/](http://www.fuelpovertyindicator.org.uk/)

140. Transactions by Dwelling Type; Total Sales - all dwelling transactions during 2006 - ONS, Communities and Local Government

141. Price Indicators for All Dwellings; Lower Quartile prices are the prices of the lower quarter of all prices, 2006 - ONS, Communities and Local Government

142. Price Indicators for All Dwellings; Median is the price at which the number of lower priced transactions is equal to the number of higher priced transactions. 2006 - ONS, Communities and Local Government

143. Price Indicators for All Dwellings; Upper Quartile prices are the prices of the upper quarter of all prices, 2006 - ONS, Communities and Local Government

144. Transactions by Dwelling Type; Flat - proportion of all dwelling transactions that were for flats, 2006 - ONS, Communities and Local Government

 155. Employment Deprivation Ranking - Ranking of average SOA score per ward for the Index of Multiple Deprivation 2007

# Stronger Communities

## The promotion of stronger communities means that:

- People feel safe.
- People have access to good quality housing and support, education, training and employment.
- People live in healthier communities and have happy, independent and healthy lives.
- People can develop their own communities and treat each other with respect and consideration.
- Older people feel valued, contribute and benefit from the Bay's improved economy.

This links to other parts of the 'Wheel' through support in strong local communities, with the development of young people with skills and positive aspirations for the future of the Bay, and the empowerment of older people to contribute fully to economic and social well-being.

## Our key findings

- The profile of Torbay's housing stock in 2001 showed high levels of owner occupied; and also high levels of private rented. On the whole, social housing levels in the bay are lower, there are however two wards with significantly higher levels.
- The 2006 housing condition survey showed that 80% (4 out of 5 wards) have a significantly higher proportion of private sector dwelling classified as non-decent compared to the national.
- The rate of homeless and in priority need applications to local authority was significantly lower in Torbay at 1.8 per 1,000 households compared to 3.0 per 1,000 nationally.

- The average number of admissions to hospital per year (over a 3 year period) in the bay was around 33,400. This is lower than we would expect for Torbay; admissions in Watcombe were, on average, around 10% higher than expected. Tormohun residents had significantly higher than expected levels of non-elective admissions (emergency), around 10% higher than expected.
- Alcohol related admissions to hospital in 2006/07 were around 1,621 per 100,000 population in Torbay, significantly higher than the national 1,384 per 100,000.
- Teenage conceptions rates in the bay are the highest in the South West region, and are significantly higher than the national rate.
- Public perception (2006) of different types of Anti Social Behaviour (ASB), including drunk and rowdy behaviour and vandalism are significantly higher than national levels. Local research shows that in general, the perception of ASB feeds people's fear of crime that consequently has a negative impact on their quality of life.
- Overall, the levels of recorded crime in Torbay are well below the national rates. However violent crime against the person in Torbay is higher than the national average. A significant proportion of these crimes are attributed to be domestic abuse incidents.

Whilst we have identified indicators relating to the stronger communities section, we fully acknowledge that there are limitations and gaps due to the data that is available.

## Some examples of the limitations and future developments for the stronger communities data set

- Data from the 2001 census will not be updated until the 2011 census.
- Domestic abuse levels.
- Recorded crime with drug and alcohol links.
- Internet connectivity of households.
- Disabled facilities grants.
- Disease survival rates per ward.
- Updated perception on anti social behaviour.
- Predictive modelling around future disease prevalences.

All Council Tax Rateable Dwellings - Council Tax valuation lists have been provided by the Value Office Agency (VOA) and the Department for Communities and Local Government (CLG) to facilitate assessment of the overall number of domestic properties and their distribution across specific Council Tax bands, ONS

20. All Council Tax Rateable Dwellings - Band A - Proportion of all overall domestic properties within Band A, 2006 CLG,

21. All Council Tax Rateable Dwellings - Band B - Proportion of all overall domestic properties within Band B, 2006 CLG,

22. All Council Tax Rateable Dwellings - Band C - Proportion of all overall domestic properties within Band C, 2006 CLG,

23. All Council Tax Rateable Dwellings - Band D - Proportion of all overall domestic properties within Band D, 2006 CLG,

24. All Council Tax Rateable Dwellings - Band E - Proportion of all overall domestic properties within Band E, 2006 CLG,

25. All Council Tax Rateable Dwellings - Band F+ - Proportion of all overall domestic properties within Band F and above, 2006, CLG

26. Private sector dwellings, 2006 House Condition Survey, Torbay Council (Private sector dwellings include private rented, owner occupied and Housing Association dwellings. Torbay Council has transferred all its housing stock to Riviera Housing Trust so these dwellings are included as part of the Housing Association figure)

27. Non decent Private Sector Dwellings, 2006 House Condition Survey, Torbay Council (Non decent dwellings do not meet the

Government's Decent Homes Standard. The Standard's criteria is that homes must be above the legal minimum standard for housing, in a reasonable state of repair, have reasonably modern facilities and services, and provide a reasonable degree of thermal comfort. Private sector dwellings include private rented, owner occupied and Housing Association dwellings)

28. Inadequate thermal comfort - Private Sector Dwellings, 2006 House Condition Survey, Torbay Council (Dwellings with inadequate thermal comfort do not meet the thermal comfort criteria within the Government's Decent Homes Standard. Private sector dwellings include private rented, owner occupied and Housing Association dwellings)

29. Disrepair - Private Sector Dwellings, 2006 House Condition Survey, Torbay Council (Dwellings in disrepair do not meet this part of the Government's Decent Homes Standard. Private sector dwellings include private rented, owner occupied and Housing Association dwellings)

30. Vulnerable households - Private Sector Dwellings, 2006 House Condition Survey, Torbay Council (Vulnerable households are those in receipt of certain benefits. Private sector dwellings include private rented, owner occupied and Housing Association dwellings)

31. Vulnerable households in non decent dwellings - Private Sector Dwellings, 2006 House Condition Survey, Torbay Council (Vulnerable households are those in receipt of certain benefits. Non decent dwellings do not meet the Government's Decent Homes Standard. Private sector dwellings include private rented, owner occupied and Housing Association dwellings)

32. Housing waiting list - Rents, lettings and tenancies: Percentage of all households on local authorities' housing waiting list, 2006/07, Communities and Local Government

## Stronger Communities notes:

Numbers / percentages may not add due to rounding

\* Not published due to small figures

65. Teenage conceptions at ward level - 2001/02 to 2004/06 aggregated average, ONS,

66. Physically Active Adults - Percentage of adults (16+) who reported participating in moderate intensity sport or recreational activities for 30 minutes or more on 20 or more days in the previous four weeks, in the Active People Survey 2006, APHO

67. Obese Adults, Percentage of persons aged 16+ who are estimated to be obese based on the Health Survey for England 2003-2005, APHO

68. Drug Misuse - estimate of resident persons aged 15-64 believed to be problem drug users in 2004-05 per 1,000 residents aged 15 - 64 years APHO

69. Binge Drinking - Proportion of adult men who drank 8 or more units of alcohol on the heaviest drinking day in the previous seven days at time of survey and adult women who drank 6 or more units of alcohol on the heaviest drinking day in the previous seven days at time of survey, 2003/05

70. Smoking Prevalence, modelled on number of persons aged 16+ who are self-reported smokers in a sample survey of the population of England 2003-2005, ONS

71. Healthy Eating, Modelled on Proportion of adults who reported consumption of 5 or more portions of fruit and vegetables, 2003/05, APHO

72. Road Deaths and Injuries, people killed or seriously injured on the road, rate per 100,000 population 2003/05, APHO

73. Cancer deaths <75 years DASR per 100,000 (based on 2003-2005 data), APHO

74. Circulatory Disease deaths <75 years DASR per 100,000 (based on 2003-2005 data) APHO

75. Suicides and undetermined injuries all ages DASR per 100,000 (based on 2003-2005 data) NCHOD, Torbay Care Trust

76. Accidents - Accidental deaths all ages DASR per 100,000 (based on 2003-2005 data)

77. Estimated tobacco attributable premature mortality (ages 35 to 69 years) SMR, 2003/2005, SWPHO

78. Infant mortality, number of premature deaths per 1,000 live births, 2004/06 NCHOD

79. Mortality from stroke - DSR per 100,000 2005/07, NCHOD

80. Prevalence of hypertension (males 16+) - 2007, These estimates and projections of the prevalence of hypertension in people aged 16+ have been calculated using a model developed at the Dept of Primary Care and Social Medicine, Imperial College, London

126. Rank of Barriers to Housing and Services Deprivation Domain - Ranking of average SOA score per ward for Barriers to Housing and Services Deprivation Domain, 2007

127. Rank of Crime and Disorder Deprivation Domain - Ranking of average SOA score per ward for Crime and Disorder Deprivation Domain, 2007

128. Rank of Living Environment Deprivation Domain - Ranking of average SOA score per ward for Living Environment Deprivation Domain, 2007

# Younger People

**This section on younger people is in addition to the community plan themes and has been included to give an overview of the challenges and issues for younger people in the Bay.**

Improving the outcomes for all children and families underpins our overall aim to improve the Bay's economic prosperity.

## Our key findings

- Torbay's demographic base has a significantly lower proportion of young people; this proportion is projected to decrease slightly over the next five years despite a slight increase in overall numbers.
- In 2001, around 12% of dependent children in Torbay lived within a household without central heating. This is significantly higher than the national average.
- Over a quarter of all dependent children in the bay lived in a lone parent family (2001); this figure was highest in Tormohun with over a third of dependent children living in a lone parent family.
- The rate of children looked after per 10,000 is significantly higher in Torbay, at 67 per 10,000, compared to the national 54 per 10,000.
- Fewer children per 10,000 became subject to a child protection plan in the bay compared to the national average.

Whilst we have identified indicators relating to the younger people section, we fully acknowledge that there are limitations and gaps due to the data that is available.

## Some examples of the limitations and future developments for the younger people data set

- Data from the 2001 census will not be updated until the 2011 census.
- More detailed data on participation in positive activities.
- Employment patterns of younger people.
- Increase data at ward level.
- Youth re-offending.
- Data on extended services provision.

In addition to the Community Plan themes, the JSNA has incorporated three sections to highlight different inequalities and challenges for different sub-sets of the population - younger people, older people and vulnerable people.

Numbers / percentages may not add due to rounding

- 61. Proportion of clients accessing Supporting People services who are aged 16-17 years, Supporting People Client Record Office, 2007/08
- 62. Change in number of clients accessing Supporting People services who are aged 16-17 years, Supporting People Client Record Office, 2006/07 - 2007/08
- 63. NI 51: Effectiveness of child and adolescent mental health (CAMHS) services (LAA), Annual Performance Assessment 2007/08
- 64. Childhood Obesity. Reception year & Year 6 - Overweight and Obese results from 2007/08 Height and Weight Survey, Torbay Care Trust and NCMP

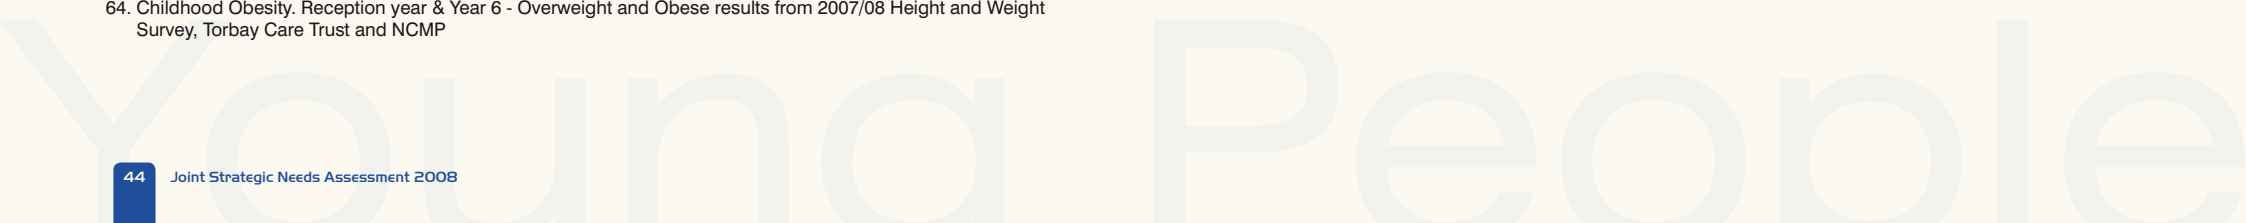

65. Non-elective admissions for injuries and poisonings (0 to 14), SAR, 2007/08

66. Disorders of teeth and jaw, SAR, 2007/08

67. Unintentional and deliberate injuries to children and young people - Admissions to hospital per 10,000 children aged 0 to 17 (inclusive), 2006/07.

68. First time entrants to the Criminal Justice System - Rate of first time enterants aged 10 to 17 to the criminal justice system per 100,000 10 to 17 year olds, 2007/08, Torbay Youth Offending Team and DCSF

69. Income Deprivation Affecting Children - Ranking of average SOA score per ward for the Index of Multiple Deprivation 2007

# Older People

**This section on older people is in addition to the community plan themes and has been included to give an overview of the challenges and issues for older people in the Bay.**

Our aim is to improve the quality of life for all residents and where necessary, personalise packages of care and support to enable independent living.

## Our key findings

- The proportion of Torbay's population aged 50 and over is currently 43.5%; this is projected to increase to 45.0% in 5 years time. The proportion of people aged 65 and over is projected to be just under a quarter (24.7%) of the total population in 5 years, compared to around 17.0% nationally.
- In 2001 well over a third of all households in the bay were occupied by a person of pensionable age; of the households occupied by a person of pensionable age, a third were occupied by a lone female of pensionable age.
- Just under a quarter (23.2%) of the 60 and over population claimed pension credits in 2007/08, compared to 21.2% nationally. The three wards of Ellacombe, Roundham with Hyde and Tormohun had in excess of 30% claiming pension credits.

Whilst we have identified indicators relating to the older people section, we fully acknowledge that there are limitations and gaps due to the data that is available.

## Some examples of the limitations and future developments for the older people data set

- Data from the 2001 census will not be updated until the 2011 census.
- Employment patterns.
- Skills of older people.
- Past times and hobbies.
- Volunteering.

- 30. Rank of Income Deprivation Affecting Older People Sub Domain - Ranking of average SOA score per ward for the Index of Multiple Deprivation 2007

# Vulnerable People

**This section on vulnerable people is in addition to the community plan themes and has been included to give an overview of the challenges and issues for vulnerable people in the Bay.**

We are committed to safeguarding all vulnerable people in Torbay and delivering a wide range of quality services to meet the need of users. Services which protect and focus on individuals, supporting them where necessary to maintain independence wherever possible.

## Our key findings

- 5,000 adults in Torbay received community care services during 2007/08 for physical disability, frailty and sensory impairment, learning disability, mental health, substance misuse and vulnerable people services. This is a rate of 4,860 per 100,000 locally compared to 3,990 nationally.
- The rate of older people aged 65 and over admitted on a permanent basis to residential or nursing care homes in the Bay is significantly higher than the national rate.
- Torbay has a lower rate of adults with mental health problems helped to live at home.
- Levels of people providing unpaid care in Torbay are higher than both the national and regional levels, with 2.8% of the total Torbay population providing 50+ hours a week unpaid care, compared to 2% nationally.

Whilst we have identified indicators relating to the vulnerable people section, we fully acknowledge that there are limitations and gaps due to the data that is available.

## Some examples of the limitations and future developments for the vulnerable people data set

- Data from the 2001 census will not be updated until the 2011 census.
- Experience of patient care.
- Family perceptions of care packages received.
- Predictive modelling of future service demands.
- Safeguarding adults.

### Vulnerable People notes:

Numbers / percentages may not add due to rounding

43. All people who provide unpaid care: 20-49 hours a week, 2001 Census, ONS

44. All people who provide unpaid care: 50 or more hours a week, 2001 Census, ONS

45. One person in household with a limiting long-term illness of pensionable age, 2001 Census, ONS

46. 65 and over population claiming Attendance Allowance, 2007/08 (quarterly average) DWP

47. 85 and over population claiming Attendance Allowance, 2007/08 (quarterly average) DWP

48. Duration of Attendance Allowance claim - Less than 12 months, 2007/08 (quarterly average) DWP

49. Duration of Attendance Allowance claim - 1 year and up to 2 years, 2007/08 (quarterly average) DWP

50. Duration of Attendance Allowance claim - 2 years and up to 5 years, 2007/08 (quarterly average) DWP

51. Duration of Attendance Allowance claim - 5 years and over, 2007/08 (quarterly average) DWP

52. Mobility award rate of Attendance Allowance - Lower Rate, 2007/08 (quarterly average) DWP

53. Mobility award rate of Attendance Allowance - Higher Rate, 2007/08 (quarterly average) DWP

# Appendix I : i-Bay Intelligence Network and Contributors to the 2008 JSNA

The 2008 Joint Strategic Needs Assessment for Torbay was written by i-Bay, Torbay's local intelligence network. This has made the 2008 JSNA a partnership document covering different organisations within the local area.

The names and organisations of contributors to the document are listed below:

Name	Role	Organisation
Alan Denby	Regeneration Manager	Torbay Development Agency
Alex Wadsworth	Information Analyst	South Devon College
Ali Grant	Senior Performance Officer	Torbay Council
Bernard Page	Service Manager Policy & Partnership	Torbay Council
Claire Truscott	Supporting People Information & Communication Officer	Torbay Council
Colin Shorthouse	Area Manager	Connexions Cornwall and Devon
Dan Hallam	Head of Information, Performance and Funding	South Devon College
Debbie Stark	Acting Director of Public Health	Torbay Care Trust
Doug Haines	Public Health Analyst	Torbay Care Trust
Ges Hughes	Safer Communities Analyst	Torbay Council
Ian Tyson	Assistant Finance & Commissioning Manager	Torbay Care Trust
Jo Beer	Audit Officer	Torbay Council
John Grange	Data and Information Manager	Torbay Council
Ken Pickering	Former Torbay CAB Manager	Torbay Citizens Advice Bureau
Lesley Gibbings	Pupil Data Manager	Torbay Council
Natalie Evans	Research Assistant	Torbay Council
Paul Whitcomb	Performance Information Manager	Torbay Care Trust
Phil Rigg	Planning & Performance Manager	Devon and Cornwall Constabulary
Philip Vandenhove	Project Co-ordinator	Torbay Council
Ruth Roberts	Partnership & Joint Commissioning Manager	Devon and Cornwall Probation Service
Vickie Vernal	Performance Information Support Officer	Torbay Council

# Appendix 2 : Maps

The maps contained illustrated areas of greatest inequalities, and show the domains from the 2007 English Indices of Multiple Deprivation, a local index of need for younger people and also working age people claiming out of work benefits.

A detailed paper on the 2007 English Indices of Multiple Deprivation can be viewed at: [www.torbay.gov.uk/the\\_english\\_indices\\_of\\_deprivation\\_2007.doc](http://www.torbay.gov.uk/the_english_indices_of_deprivation_2007.doc)

Map 1 : 2007 Index of Multiple Deprivation

Map 2 : 2007 Rank of Income Deprivation

Map 3 : 2007 Rank of Employment Deprivation

Map 4 : 2007 Rank of Health and Disability Deprivation

Map 5 : 2007 Rank of Education, Skills and Training Deprivation

Map 6 : 2007 Rank of Barriers to Housing and Services Deprivation

Map 7 : 2007 Rank of Crime and Disorder Deprivation

Map 8 : 2007 Rank of the Living Environment Deprivation

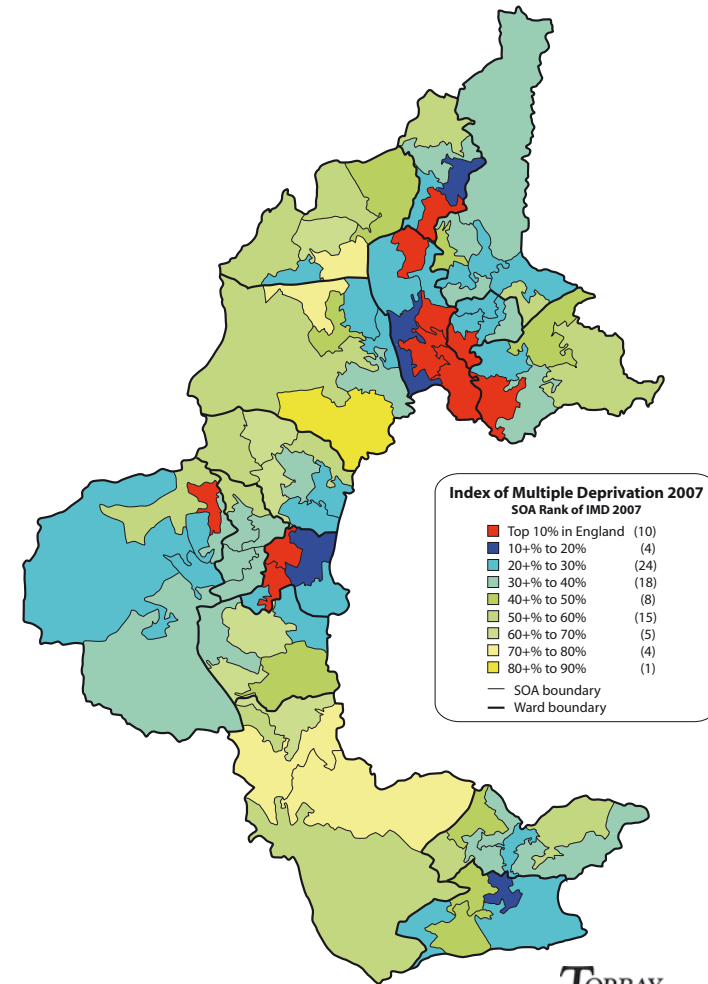

Map 9 : 2007 Rank of Income Deprivation Affecting Children

Map 10 : 2007 Rank of Income Deprivation Affecting Older People

Map 11 : 2008 Children's Services Index of Need

Map 12 : NI 153 - Working Age People Claiming Out of Work Benefits in the Worst Performing Neighbourhoods
