#### **Trust CIP Programme and Governance Structures**

The Trust has, historically, had a good record on delivering against its CIP Targets. This has been possible through the organisation's ability to scope opportunities, produce good quality data and identify and resource dedicated project teams and project managing schemes that deliver on time, supported by a robust CIP performance management and Project Management Office (PMO) function. However, like most other NHS organisations, we acknowledge that identifying and delivering recurrent savings, in particular, is proving increasingly challenging and requires a different approach.

Additionally in regard this Annual Strategic Agreement trying to align the different planning cycles which are driven nationally for local authorities and the NHS has been challenging.

The Trust wide CIP programme for 2016/17 builds on the strategies of the past and also seeks to address the challenges faced through a constructive, inclusive approach to deliver authenticated schemes. The proposed portfolio is partially based upon the Trust's Five Year Plan that was previously submitted to Monitor in 2015 and was the product of Healthcare benchmarking provided by the NHS Benchmarking authority, trust-wide engagement and regional networking as well as a review undertaken by Ernst & Young. It has been cross referenced to the findings of the Carter Review.

The CIP planning process is dynamic and the number of projects in play changes as schemes progress through the development stages. At the time of drafting this Agreement the Trust has identified 74 schemes with the potential to reduce cost or improve efficiency. The indicative full year effect of these schemes is £14.5m, the schemes are summarised in Table One below.

#### The schemes include:

- Workforce savings to be achieved through a range of initiatives which focus on reducing the need for expensive temporary staff, improved rostering, revised skill-mix, management-restructuring and reduced absenteeism.
- Income generation created through partnerships with our neighbours for example utilisation of capacity, within our Cardiac Catheterisation lab, and through exploiting volume based commissioning arrangements where possible. The Trust will also continue to run profitable franchised services and further expand salary sacrifice schemes.
- Enhanced procurement to reduce the costs of our consumables and our costbase will be further lowered through a range of pharmacy initiatives to reduce drug spend.

 Within community services, we will continue to reduce costs through earlier intervention, in partnership with primary care services, further utilisation of the independent sector and improved management/review of care. We will seek to support greater independence through supported living for people with learning disabilities, re-structure packages of care and remove double handling. The service will also benefit from reduced costs in areas such as insurance as a result of integration.

Once the consultation exercise current being run by the CCG has concluded, and the outcomes have been carefully considered, it may be that further schemes can be developed.

The schemes set out in Table One have been scoped to assess the potential for delivery and RAG rated with the following results:

Green (delivered or low risk to delivery): £ 3.2m
 Amber (moderate risks to delivery): £ 4.5m
 Red (significant risks to delivery): £ 2.3m
 Not yet assessed £ 4.6m
 £14.5m

In addition to the potential savings schemes set out in Table One other areas where there may be the opportunity to make further savings have been suggested but have not yet been scoped. These areas are listed in Table Two; work to assess the potential of these suggested savings schemes will be progressed by the PMO.

The areas of work set out in Tables One and Two comprises projects that span all areas of our recently integrated community and acute services. The potential benefits will be delivered in parallel with the synergies achieved through integration and a new care model that seeks to provide the right care in the right place at the right time for people who live in Torbay and South Devon.

The Trust recognises that delivery against these schemes is not yet assured and that successful delivery requires projects that are feasible, clear leadership, sufficient delivery resource and a robust governance framework to ensure visibility and accountability.

The Trust has appointed an interim deputy Chief Operating Officer to provide additional professional input to the process. The Trust has also created a dedicated transformation project delivery team who will assist with the delivery of the ICO based CIP projects. In addition, the PMO and Finance reporting tools are being further enhanced to ensure the timely reporting of scheme delivery progress to the Executive board. Appropriate action will be taken to get any delayed schemes back on track (or devise replacement schemes).

The next phase sees outline planning for each project to establish key metrics such as timeline, resources, workforce implications and risks. These will be set out on a standard Project Inception Document for all schemes over £50k. A quality impact assessment will also be produced and signed off by the Medical Director and Chief Nurse to ensure any risks to patient care are resolved.

All 'approved schemes' will be managed through a revised governance process that includes a more robust reporting, assurance and escalation through a bi-weekly CIP review meeting with key managers.

Reporting to Board is secured through a reporting structure through the Senior Business Management Team meeting, through Finance Committee to Board. Detailed scheme level reporting will be in place across all of these levels.

The output from the Trust's internal process is reported through the Risk Share Oversight Group, which is the forum through which Commissioners gain assurance.

## Table Two

## **Potential Savings Suggested but Not Yet Scoped**

Area	Opportunity
Education	Income from Training
Finance	Patient Access Booking
Human Resources	Improved Rostering Practices
Human Resources	Removal of paper timesheets
Human Resources	Employee on line self service
Human Resources	Staff wellbeing and improved Absence (Sickness, Holiday and other absences) recording to ensure better visibility and accountability
Operations - Community	Review Continence assessments
Operations - Community	Review CHC Nursing model
Operations - Community	Benchmarking and consistency across zones
Operations - Community	Blue badges – administration
Operations - Community	Chronic fatigue services – service redesign.
Operations - Community	Review of on-call arrangements
Operations - Community	Redesign of Stroke and Neuro pathways
Operations - WCDT	Open Access to GP patients for plain x-rays
Operations - WCDT	RFID Tagging
Operations - WCDT	Review outsourced maintenance contracts
Operations - WCDT	Review Community Loan Service
Operations - WCDT	Long term plan to combine UKAS registration into one instead of four
Operations - WCDT	Investigate potential for synergies from further back office shared services
Operations - WCDT	Order Comms savings
Operations - WCDT	Increased scope for Advanced Practitioner Reporting Radiographers would reduce the need for outsourcing of plain film radiography
Strategy and Improvement	Private Treatment
Strategy and Improvement	On-line medical sales
Strategy and Improvement	Advertising Income
Strategy and Improvement	R&D income generation
