Subject: Brixham Peninsular Neighbourhood plan

Dear Sir / Madam,

I write in support of the Brixham Peninsular Neighbourhood Plan. As a resident of Galmpton I am within the area covered by the plan and think it provides a good blueprint for the future development of the region. It allocates space for both jobs growth and housing that will meet local needs for a considerable period, while still maintaining the essentially rural character of the area. The plan is highly detailed, with these three main topics (jobs, housing and green spaces) covered in individual sections, while still maintaining an overall holistic approach. The design statements for each of the villages and town show their key features and suggest how development can harmonise with the existing character. There is also good consideration for maintaining the green spaces, which residents value so much for leisure purposes and creating the distinctive character of the area.

The overall effect of the plan will be to allow the Brixham peninsular to grow, but still retain it as an attractive area that tourists will wish to visit. Thus creating new opportunities, without destroying the existing ones. I hope you will pass this plan and allow its positive policies to be implemented.

Yours faithfully,

Richard Boyles
