Adi described the plans/proposals/Tenders for fence upgrades.	
The tur enclosure is close to the first security fence and bolted ove flight mode (TB testing taking place). This fence is being heightene also 'badger proofed' in accordance with either DEFRA guidance or Site clearance will begin in January and completed early spring. A	ed but DCC. small
amount of tree clearance/pruning will take place to prevent damage	ge.
Officer viewed the tur enclosures and were shown how it and the I had escaped and showed areas where the fences would be upgrad	
Officers were also shown plans for upgrades to enclosures around that were not currently badger proof.	the site
