

Peak Oil & Climate Change

By current predictions, the impact in Torbay is likely to be:

- higher temperatures all year round
- less rain in the summer, leading to droughts
- more rain in the winter, leading to flooding
- more storms and storms of a greater intensity
- a 90cm rise in relative sea levels by 2080
- higher food, electricity and petrol prices

So what can we do?

Get informed - visit your local library!

Torbay is now officially a **Transition Town**, and **your local library** is the place to go for a range of books, DVDs and leaflet information on climate change, the environment and what we can do to reduce our carbon footprint and lead 'greener' lives. Special promotions will be circulating around the 4 branch libraries on the following themes:

Waste & recycling **Energy** **Transport** **Local food**

This stock will be available on a 7 Day loan basis so as many people as possible can get up to date on transition culture. You can also find out more at:
