REPORT

To Tor Bay Harbour Committee.

As the independent designated person appointed by Tor Bay Harbour Authority, we report on the Safety Management System, Issue 4, dated 5th November 2005.

We have reviewed compliance with the Safety Management System during the past year. Changes in operating procedures have led to the drawing up of a new compliance document.

We have reviewed the updated Safety Management System, Issue 5, dated 23rd November 2006.

In our opinion there is now in place a safety management system which - if maintained actively - complies with the requirements of the Port Marine Safety Code and enables Tor Bay Harbour Authority to set out its safety policies, its organisation which can put them into practice and its procedures for a planned and systematic approach to policy implementation.
