

**Internal Audit Report** 

Port Marine Safety Code Follow up of 2019/20 Report

Tor Bay Harbour Authority

November 2020

Official

Support, Assurance & Innovation

## **Devon Audit Partnership**

Devon Audit Partnership has been formed under a joint committee arrangement comprising of Plymouth, Torbay, Devon, Torridge and Mid-Devon councils and we aim to be recognised as a high quality public sector service provider.

We work with our partners by providing professional internal audit and assurance services that will assist them in meeting their challenges, managing their risks and achieving their goals. In carrying out our work we are required to comply with the Public Sector Internal Audit Standards (PSIAS) along with other best practice and professional standards.

The Partnership is committed to providing high quality, professional customer services to all; if you have any comments or suggestions on our service, processes or standards, the Head of Partnership would be pleased to receive them at robert.hutchins@devonaudit.gov.uk.

## **Confidentiality and Disclosure Clause**

This report is protectively marked in accordance with the National Protective Marking Scheme. Its contents are confidential and, whilst it is accepted that issues raised may well need to be discussed with other officers within the organisation, the report itself should only be copied/circulated/disclosed to anyone outside of the organisation in line with the organisation's disclosure policies.

This report is prepared for the organisation's use. We can take no responsibility to any third party for any reliance they might place upon it.

### 1 Introduction

The 'Port Marine Safety Code (PMSC)' establishes a national standard for every aspect of port marine safety and aims to enhance safety for those who use or work in ports, their ships, passengers and the environment. The code applies to all harbour authorities in the UK that have statutory powers and duties. The Devon Audit Partnership is the appointed 'Designated Person' for the Tor Bay

The Devon Audit Partnership is the appointed 'Designated Person' for the Tor Bay Harbour Authority.

## 2 Audit Opinion

Based upon progress made against previous recommendations and agreed actions, and the findings of last year's Audit against the revised code requirements, in our opinion the Tor Bay Harbour Authority remains compliant with the requirements of the Port Marine Safety Code.

## 3 Executive Summary

Due to the Covid-19 pandemic for the 2020/21 year, we have only undertaken a follow up of the previous findings and recommendations made in relation to 2019/20. This was undertaken remotely due to current Covid-19 restrictions and associated working practices, and as such we have not undertaken any site visits. Within the follow up we have examined a restricted sample of records relating to previous recommendation made in relation to the Tor Bay Harbour Authority and its compliance with the requirements of the Port Marine Safety Code and obtained such explanations and carried out such tests as we consider necessary to confirm Management have actioned previous recommendation.

To the best of our knowledge and belief, having carried out appropriate checks within the remit of the follow up exercise, and considered responses provided to us by relevant Harbour staff, in our opinion the Tor Bay Harbour Authority remains compliant with the Port Marine Safety Code. We continue to have significant concerns in relation to land-based Health and Safety (H&S), however these are outside of the scope of the Code.

We have noted areas where action is required (refer to Appendix A).

For completeness we have also attached a summary of the current status of previous actions including any arising land-based issues (please refer to Appendix B).

The detailed findings and recommendations regarding these issues and less important matters are described in the Appendices. Recommendations have been categorised to aid prioritisation. Definitions of the priority categories and the assurance opinion ratings are also given (please refer to Appendix C).

## 4 Added Value

Compliance against the requirements of the Port Marine Safety code.

### 5 Assurance Opinion on Specific Sections

The following table summarises our assurance opinions on each of the areas covered during the audit. These combine to provide the overall assurance opinion at Section 2. Definitions of the assurance opinion ratings can be found in the Appendices.

Risk Covered		Level of Assurance		
1	Non-Compliance with Port Marine Safety Code	Compliant with the requirements of the Port Marine Safety Code (note, this year's assurance is solely based upon the outcomes of the remote follow up exercise of recommendations made in 2019/20 and as such we have not undertaken any site visits)		

The findings and recommendations in relation to each of these areas are discussed in the "Detailed Audit Observations and Action Plan" appendix. This appendix records the action plan agreed by management to enhance the internal control framework and mitigate identified risks where agreed.

## 6 Issues for the Annual Governance Statement

The evidence obtained in internal audit reviews can identify issues in respect of risk management, systems and controls that may be relevant to the Annual Governance Statement.

Following our review, we suggest that the ongoing land-based Health and Safety issues, although not relevant to Port Marine Safety code compliance, warrant inclusion within the Annual Governance Statement.

### 7 Scope and Objectives

Due to Covid-19 restrictions, Devon Audit Partnership as Designated Persons have undertaken a Port Marine Safety Code review in the form of a follow up of the 2019-20 Port Marine Safety Code report, and as such our conclusion is based upon that evaluation and associated outcomes.

To note, our original 2019/20 audit was undertaken based upon the Department for Transport's Port Marine Safety Code, and the associated Port Marine Safety Code Guide to Good Practice.

## 8 Inherent Limitations

The opinions and recommendations contained within this report are based on our follow up of previous recommendations made in the 2019/20 report, including review of related evidence, and discussions with responsible officers.

### 9 Acknowledgements

We would like to express our thanks and appreciation to all those who provided support and assistance during the course of this audit.

Robert Hutchins Head of Partnership

## Appendix A

## **Detailed Audit Observations and Action Plan**

Risk Covered: Non-Compliance with Port Marine Safety Code			
Opinion Statement:			
Taking into account the opinion statement provided within the 2019-20 audit report, and the current status of actions against recommendations in appendices A and B, we consider the Tor Bay Harbour Authority remain compliant with the Port Marine Safety Code, subject to the limitations in our work as described in the level of assurance opposite and the Executive Summary and other relevant areas of this report.	Compliant with the requirements of the Port Marine Safety Code		
It was pleasing to note that a number of recommendations are either complete or remain in progress, however, there remain some areas where further action is required as outlined in the appendices A and B.	(note, this year's assurance is solely based upon the outcomes of the remote follow up		
<ul> <li>These primarily relate to: <ul> <li>approval of duty holder terms of reference and power of directions;</li> <li>risk assessments and associated SOP for defective vessels;</li> <li>evidence of training for lone working;</li> <li>update SHE assure to reflect dates of all training undertaken by staff;</li> <li>the need for a SOP for forklift use has not previously been accepted by management and therefore remains a risk;</li> <li>edge protection policy has been subject to review and an update requested. The policy has been approved subject to strengthening of the section relating to alcohol use, however we have made an additional recommendation to strengthen this further by referral to substance abuse;</li> <li>there remains a risk around access to MarNIS although we understand that resolution of this is cost prohibitive.</li> </ul> </li> <li>Although we recognise that Land based Health and Safety is outside of scope of Port Marine Safety Code, we continue to be concerned that related risks are not being adequately mitigated. Our opinion is based upon knowledge of ongoing issues and occurrences relating to poor H&amp;S practices within Tor Bay Harbour Authority. As such we have made further recommendation that Health and Safety</li> </ul>			

No.	Observation and implications				
1.1	AIS (automatic identification system) is available to the harbours however it is not currently used to determine the level of vessel movements on a annual basis.				
	Recommendation	Priority	Management response and action plan including responsible officer		
1.1.1	Given that vessel traffic is on the increase and the 3 ports are especially busy in the summer months it would be beneficial to have statistics relating to the level of vessel movements. This information could be used to determine if any action is required to minimise the risk of collision especially between vessels and people.	Medium	AIS is available to various Harbour staff. Greater use will be made of AIS as a vessel identification tool, especially vessel monitoring via a more frequent review of it. However meaningful statistical analysis will be problematic as the requirement to have it is based on factors such as vessel tonnage and as such many recreational vessels are not required to have AIS fitted (and thus do not) AIS use for collision avoidance is not allowed. Collision avoidance responsibility lies with the individual vessels		
	e making greater use of AIS to monitor vessel movements (for example, all

No.	Observation and implications				
1.6	A SOP has been established for 'Pilotage and Defective Vessel Notification' however this does not include details of reporting to MCA should there be a defective vessel. It was also noted that there is no risk assessment for defective vessels (injurious vessel) within the harbour limits, this was identified at the workshop and a new RA is being formulated with APBmer.				
	Recommendation	Priority	Management response and action plan including responsible officer		
1.6.1	Once the new risk assessment has been received and put into MarNIS it should be determined if a new SOP should be drawn up or the existing one amended. As a minimum the existing SOP will require updating to include reporting procedures.	Medium	Noted Will be actioned once feedback from APBMer received – AP/SF		
Manag	ement Response				
Comple	ete, risk assessment and SOP now done.				
	n <b>ment – Complete</b> k assessment and associated SOP have been produced in December 202	20 and now f	orm part of the policy and risk assessment framework.		
ΑΟΤΙΟ	N: None				
No.	Observation and implications				
1.7	Harbour staff across all 3 harbours have undertaken various training courses and all details are logged in a training matrix. It was noted that whilst a number of staff had received training in manual handling / working at heights etc, however these were completed several years ago.H&S have confirmed that best practice is for this training to be refreshed every 3 years.				
	It was also noted that the SOP for lone working states that staff are trained, and that refresher training should be undertaken at regular intervals. In addition, the training should be logged in the training matrix. Our review found that this was not undertaken or recorded.				
	Recommendation	Priority	Management response and action plan including responsible officer		
1.7.1	A full review should be undertaken to see what training / refresher training is required for all staff. Additionally, lone working training should be provided to and undertaken by all applicable staff, and the training matrix updated accordingly.	Medium	This is 'business as usual' and reviewed annually Individual training undertaken should be added as completed, with an annual review and consolidation exercise undertaken.		
			The next review is due shortly – KA - end Dec 2019		
Manag	ement Response		· ·		
	g in manual handling and working at height was provided to all Harbour As				
Assure	(in fact the Harbour Authority is the first department so to do which has no	ow been corr	ectly configured to accept certification/training end-dates. The		

process of entering these dates has started and is expected to be complete by Jan 2021.

#### IA Comment – Part actioned – re-report

SHE Assure has a risk assessment for Lone Working. We were unable to evidence that Lone Working training had been completed. In addition, although training records were transferred to SHE Assure, the individual staff training dates have yet to be migrated across.

**ACTION**: SHE Assure to be updated to reflect dates of training undertaken by staff. Evidence of Lone Working training to be recorded on SHE Assure. Complete

#### Appendix B

#### Action Plan – status against 2018-19 actions and recommendations and any arising land-based issues in 2019-20

#### Previous Years (2018-19) Re-reports

<b>1.6.2</b> Further to the original recommendation regarding the forklift usage SOP and risk assessment, there is no mention of the limitations / restrictions on forklift use. We recommend that the SOP and risk assessment are updated accordingly to include any restrictions in relation to use. Medium the limitations of each FLT on first and subsequent use. This information would be contained in the Operators manual, indications and limitations as signed on each FLT. This checking by the driver is not recorded	No.	Recommendation	Priority	Management response / action plan / responsible officer
checking by the driver is net recorded.	1.6.2	and risk assessment, there is no mention of the limitations / restrictions on forklift use. We recommend that the SOP and risk assessment are	Medium	than for an individual item of plant. As the staff might have occasion to use different FLTs and acquaint themselves with the limitations of each FLT on first and subsequent use. This information would be contained in the Operators manual,

#### Management Response

No change not agreed

#### IA Comment – Not agreed

#### **ACTION**: Risk remains – refer to Management response originally given

No.	Recommendation	Priority	Management response / action plan / responsible officer
1.6.6	The Edge Protection Policy includes a risk assessment. We would recommend that the assessment be put into a standard risk assessment format to enable monitoring, evidence actions needed / undertaken and define responsibility	Low	<b>NOT AGREED</b> – the existing risk assessment does not easily fit into the standard template and there is a significant risk that vital information will be lost during reformatting. The Policy itself is taken from the ACoP and the Edge Audit spreadsheet provides assessment at multiple locations with the risks being different for each, which would then require multiple risk assessments to address each. The Edge Protection Policy was approved by Committee in December 2019.

#### Management Response

Unfortunately, the edge protection RA does not lend itself to the SHE Assure format and will thus remain in a different format for readability. However, the point regarding substance abuse is agreed and the policy has been updated in December 2020.

#### IA Comment – Complete

ACTION: None

No.	Recommendation	Priority	Management response / action plan / responsible officer
1.9.2	As best practice, for completeness and ease, we would recommend that the Business Continuity Plan (BCP) contain a link to the physical and shared drive location of the Emergency Plan, as this is referenced frequently within the BCP.	Opportunity	Agreed – plan to be updated – LS/AP Nov 19

#### Arising Land Based Issues 2019-20

No.	Original observation and implications		
1.10			
	Recommendation	Priority	Management response / action plan / responsible officer
1.10.1	It is recommended that any supporting policies (both user and internal) related to trips and falls be updated to reflect any changes in Health and Safety practices.	Medium	Noted – this is a given that all related policies will be updated to cover H&S practices in relation to the hazards associated with trips and falls - AP
Manag	gement Response	1	1

A 100% review of all RAs and SOPS has been undertaken and they have migrated to SHE Assure. The council have recognised the dangers and risks inherent in the maritime domain and have agreed that the Harbour Authority recruit a dedicated H&S manager to bring additional focus to this important area. This person is expected to be in post by March 21.

#### IA Comment – Ongoing

Although outside of scope of Port Marine Safety Code, the risk remains regarding land-based H&S issues although we recognise that a H&S Officer will be in post by March 2021. We have based our opinion on knowledge of ongoing issues and occurrences relating to poor H&S practices within Tor Bay Harbours, and as such remain concerned regarding the ongoing risks posed to the public, staff and visitors to the Harbours.

**ACTION**: Health and Safety regarding land-based practices must be formally reviewed by an appropriately qualified body and an action plan drawn up to identify mitigating actions and associated costs. This should then be presented to Senior Management for a decision on remediation action to be taken.

## **Definitions of Audit Assurance Opinion Levels**

Assurance	Definition
High Standard.	The system and controls in place adequately mitigate exposure to the risks identified. The system is being adhered to and substantial reliance can be placed upon the procedures in place. We have made only minor recommendations aimed at further enhancing already sound procedures.
Good Standard.	The systems and controls generally mitigate the risk identified but a few weaknesses have been identified and / or mitigating controls may not be fully applied. There are no significant matters arising from the audit and the recommendations made serve to strengthen what are mainly reliable procedures.
Improvements required.	In our opinion there are a number of instances where controls and procedures do not adequately mitigate the risks identified. Existing procedures need to be improved in order to ensure that they are fully reliable. Recommendations have been made to ensure that organisational objectives are not put at risk.
Fundamental Weaknesses Identified.	The risks identified are not being controlled and there is an increased likelihood that risks could occur. The matters arising from the audit are sufficiently significant to place doubt on the reliability of the procedures reviewed, to an extent that the objectives and / or resources of the Council may be at risk, and the ability to deliver the service may be adversely affected. Implementation of the recommendations made is a priority.

## **Definition of Recommendation Priority**

Priority	Definitions
High	A significant finding. A key control is absent or is being compromised; if not acted upon this could result in high exposure to risk. Failure to address could result in internal or external responsibilities and obligations not being met.
Medium	Control arrangements not operating as required resulting in a moderate exposure to risk. This could result in minor disruption of service, undetected errors or inefficiencies in service provision. Important recommendations made to improve internal control arrangements and manage identified risks.
Low	Low risk issues, minor system compliance concerns or process inefficiencies where benefit would be gained from improving arrangements. Management should review, make changes if considered necessary or formally agree to accept the risks. These issues may be dealt with outside of the formal report during the course of the audit.
Opportunity	A recommendation to drive operational improvement which may enable efficiency savings to be realised, capacity to be created, support opportunity for commercialisation / income generation or improve customer experience. These recommendations do not feed into the assurance control environment.

# Confidentiality under the National Protective Marking Scheme

Marking	Definitions
Official	The majority of information that is created or processed by the public sector. This includes routine business operations and services, some of which could have damaging consequences if lost, stolen or published in the media, but are not subject to a heightened threat profile.
Official: Sensitive	A limited subset of OFFICIAL information could have more damaging consequences if it were lost, stolen or published in the media. This subset of information should still be managed within the 'OFFICIAL' classification tier, but may attract additional measures to reinforce the 'need to know'. In such cases where there is a clear and justifiable requirement to reinforce the 'need to know', assets should be conspicuously marked: 'OFFICIAL–SENSITIVE'. All documents marked OFFICIAL: SENSITIVE must be handled appropriately and with extra care, to ensure the information is not accessed by unauthorised people.
