

Where does your recycling go?

Green Waste - Paignton

Composted and then used instead of a chemical fertiliser in agriculture.

Aluminium Cans - Warrington, Cheshire

Melted down and used to make new cans.

Paper - Kings Lynn, Norfolk

Recycled into paper for newspapers and for energy production.

Cooking Oil - Newton Abbot

Refined and processed into biodiesel fuels.

Glass - Kirby-in-Ashfield, Nottinghamshire

Recycled into glass bottles and jars.

Food Waste - Holsworthy, Devon

Anaerobic digestion, producing biogas used to generate power, provide heat and produce compost.

Wood - Winkleigh, Devon

Shredded and reprocessed for use in board manufacturing and animal bedding.

Tyres - Castle Cary, Somerset

Shredded, granulated and remade into soft surfaces for play and horse training areas.

Batteries - Lutterworth, Leicestershire

Broken down and toxic heavy metal recovered for reprocessing.

Cardboard & Tetra Pak - Caerphilly, Wales

Recycled into new cardboard packaging.

Plastic - Manchester

Recycled into new plastic food packaging.

Metal - Wokingham, Berkshire

Broken down into component parts and metals and plastics re-used.
