	Urgent Care: To improve access to in and out of		Mental Health Services: To assertively case manage patients in	
	hours GP services to avoid unnecessary overspill into secondary care.		primary care, through integrating mental health into community teams.	
WORKSTREAMS & KEY OUTCOMES	To increase self-care and pro-active case management e.g. diabetes, alcohol.		To commission a Single Point of Access to joined-up mental health services.	
	To review patient journeys through		To improve access to, and patient experience of, psychological therapy	

and crisis services, especially for children.

To implement the local Dementia Strategy.

A&E in order to redesign services to avoid unnecessary admissions.

To increase the level of pro-active care in residential homes.

Planned Services:

To ensure patients are diagnosed and receive a care plan as soon as possible.

To ensure patients receive the appropriate level of intervention, avoiding unnecessary journeys to hospital.

To ensure children receive joined-up services in appropriate settings.

Medicines Optimisation:

To achieve efficiency savings on primary care drug spend.

To review and reduce prescribing variation in all settings.

To fully utilise gain-share opportunities with secondary care.
