

# Improving Town Centre Access to Torquay via Torre...

**We would like your thoughts on plans to change the direction of traffic into the Town Centre from Torre**

1. Should traffic be allowed to go down Union Street from Brunswick Square?
2. At the Magistrates Court, should cars, buses, both, or neither be able to go down direct to Castle Circus?

*Please complete a feedback form and hand in before you go*

## Why the need for change?

The plan to change the way traffic comes into Torquay Town Centre direct from Torre will help boost the local economy and promote further growth by providing a better-quality direct 'entrance' to the town centre all the way from the gateway into the Bay at Kerswell Gardens.

It will show the area is clearly open for business, and help install confidence amongst existing and potential new businesses that the area is on the up!

The scheme includes improvements for pedestrians and cyclists with better crossings and direct safer routes.

It works alongside other significant travel projects currently ongoing or planned that will eventually see an excellent transport corridor from the seafront to Barton, Shiphay, Edginswell and the Willows.

The journey for shoppers, visitors and commuters would see less delay, less congestion, and a more direct route.

This will promote a quick, convenient and pleasant entrance into the heart of the town and at the same time reduce distance travelled by vehicles thus helping improve air quality too.

Residents will also be able to move around much more easily.
