

## Cumulative Impact Area (CIA) Crime Analysis

### Notes on data

- Analysis was undertaken using crime data for 2009, 2010, 2013 and 2014 calendar years. Data was grouped for each 2 year period.
- Non notifiable offences of breaches and failures relating to the criminal justice system were excluded eg fail to surrender for bail.
- Crime volumes were similar for the 2 periods and the percent of crimes with no geographic reference (ie no Easting/Northing) was 6% for each period.
- Data with Eastings and Northings was mapped and the crimes in the exclusion zone were counted and are reported below.

### Summary of total crime and blank GIS references

	Crimes	Blank GIS
2009&2010	21962	1337
2013&2014	21893	1273

### Crime changes

- In 2009/2010 crimes in the CIA accounted for 17% of mappable crimes, in 2013/2014 it was similar at 16%.
- Overall crime in the CIA was 6% lower in 2013 and 2014 compared to 2009 & 2010, however there were some notable differences between offence groups.
- Of particular note is the level in violent crime, with violence 53% higher in 2013/2014. This was mainly due to an increase in violence without injury.
- Violence accounted for 29% of crime in the CIA compared to 18% in 2009/2010.

### CIA crime by crime type

	2009-2010	2013-2014	Diff	% difference
