

## **Important Information in respect of the Audio Recording**

The meeting of the Planning Committee held on 30 September 2019 was recorded by an external contractor. On receiving the audio recording it has become apparent that there was a technical fault with the central device unit of the conference microphone system that feeds all recording devices. Therefore the quality of the recording is not of normal standard with very little being audible. The Council has however, uploaded the recording of the meeting it received.
