Description

Change of use and restoration of stables to hotel use including internal and external alterations.

Executive Summary/Key Outcomes

Planning permission and Listed building consent have recently been granted to secure the future of Oldway Mansion and the Rotunda as a top end hotel destination. The Stables were originally included within the scope of these applications but had to be excluded prior to determination due to the lack of emergent surveys in respect of Bat populations that were known to inhabit the building.

That information is now available and advice from Natural England is awaited.

The planning application is considered elsewhere on the Agenda and this is the linked listed building application. The Stables are Grade II listed and the most 'at risk' building within the Oldway complex. English Heritage expressed some concerns in relation to the proposed works to the Stables in responding to the original applications on the site and further advice is awaited.

In principle, the use of the Stables as part of the hotel complex is strongly supported it is important however to ensure that the works are carried out in a way that preserves the important characteristics of the listed building.

The overarching report in relation to the future of Oldway and its grounds is copied and included within the Representations pack at Page P.201. This explains the rationale and benefits of the wider project.

The consultation period will not have expired by the Committee date. However, there is urgency to achieving a resolution of this matter to halt further decline in the state of this building and to enable the developers to hit key stages in their programme of delivery of this project.

Recommendation

Referral to the NCPU subject to:

1. Advice from English Heritage.
2. No adverse comments, in relation to matters not already covered in the body of the report, having been received within the consultation period.
3. Delegation of conditions to Head of Spatial Planning to resolve following receipt of EH advice.

Site Details

The Stables is located to the rear of the Rotunda within the grounds of Oldway Mansion. It is in a very dilapidated condition. It originally comprised stabling and a banqueting hall. It is of brick construction with a slate roof with towers at either end of the building. Currently, the squash courts are attached to the eastern elevation but these are to be demolished. The building urgently requires weatherproofing to halt further deterioration. This has to be done within a prescribed period of time in accordance with conditions attached to the recent approvals.

Detailed Proposals

Is to change the use of the Stables from Council office accommodation to hotel accommodation comprising bedrooms and conference/banqueting facilities. It involves the construction of a new foyer access, reinstatement of the conservatory/Palm House, internal and external alterations. The demolition of the Squash Courts and reinstatement of the eastern elevation is included in these proposals.

Summary Of Consultation Responses

English Heritage: Comments awaited.

EH comments in relation to the original application on the site are attached on Page P.201.

Summary Of Representations

None received at time of writing.

Relevant Planning History

P/2011/0925/MPA: Development within grounds of Oldway to provide 46 3 and 4 bed family houses, 55 Sheltered units, new bowling rink, Orangery, wedding room café and restoration of historic landscape. Approved: 24.08.12

P/2011/1021/LB: Listed building consent for use of Mansion and Rotunda as Hotel: Awaiting Secretary of State Decision.

P/2011/LB: Listed building consent for works to boundary wall and Orangery: Awaiting Secretary of State Decision

Key Issues/Material Considerations

The future use of the Stables as part of the hotel complex for Oldway is strongly supported and it needs to be delivered within a tight time scale in order to halt the continued decline of these buildings and to ensure that the project is delivered within the agreed time scale.

Conditions pursuant to the recent permissions required that the reintroduction of the Stables to the Development Programme was to be achieved within a given period, that details of works to weatherproof the structure be submitted within 2 months of the main decisions on the site being issued and that the Mansion/Rotunda could not be occupied for hotel purposes until the Stables had been granted planning permission and listed building consent for the works and these were substantially complete. The reason for the timetabling is to ensure that the works are carried out quickly and comprehensively.

English Heritage responded to the original applications on the site confirming their support for the reuse and restoration of the stables although some concern was expressed in relation to the proposed works to the internal fabric of the Stables. The main points of concern were the loss of the stairs to the east and west tower and retention of stables fixtures and fittings.

EH felt that the significance of these features was not adequately addressed as part of the Heritage Statement. They considered that the stairs were original, contributed to the special architectural character of the building and the presumption should be in favour of retention. Similarly they wished to be assured of the retention of the Stable fixtures and fittings. The applicants have responded that they would like the matter to be dealt with by condition. Whilst this is feasible in relation to the fittings, the ability to retain the stairs is more fundamental and not really amenable to control in this way. Ultimately, the LBC will be determined by the Secretary of State and so it is necessary to resolve this matter if it is not to cause delays at a later stage through further discussion with EH.

Generally, the external alterations, comprising a new entrance, reinstatement of the conservatory, reinstatement of the elevations are considered acceptable. The internal works, with the exception of the loss of stairs are considered acceptable.

The conditions will need to follow those agreed in relation to the change of use of the Mansion and Rotunda with the addition of those considered necessary following discussion with EH in relation to the stairs and stable fixtures and

fittings.

Economy

Cumulatively, this project will create up to 70 jobs and result in investment in the site of around £12million pounds. There will also be spin off in the local economy from enhanced tourism facilities.

Environmental Enhancement

The future of the bat communities on the site is a critical consideration and the requirements of NE will be incorporated into the scheme. The architectural quality and character of the listed building will be protected through sensitive works of conversion.

Conclusions

Due to the need to reach a determination quickly in respect of these applications, it is recommended that if Members are happy with the broad principles involved that further discussions with EH are held to resolve the retention of the stairs and the stable fixtures and fittings. It is recommended that the final form of the conditions be delegated to the Head Of Spatial Planning to determine as the advice of EH is required before these can be finalised. The application will have to be referred to the NCPU for a formal decision.
