1. Introduction

Who is a Carer?

A Carer is anyone, including a child, who provides care to another person, apart from those who do it as paid work, voluntary work or ordinary parenting.

It includes caring for a partner, relative, friend or neighbour, who due to physical, sensory or learning disability, mental health or drug/alcohol issues, frailty, illness, long-term health condition and/or vulnerability cannot manage alone in the community.

Sometimes people are 'mutual carers' where they both provide support to each other, and everything works well until one person's health deteriorates or their situation changes. This is especially common in older couples.

Two out of three of us (65%) will be a Carer at some time in our life, but many people do not realise that they are considered to be a Carer, or that there is a wide range of support available to them. Torbay Carers' Strategy helps us to address this issue.

Why have a Carers' Strategy?

Torbay has had an inter-agency strategy (plan) for Carers since 2000 and it is updated every three years. Torbay's Carers are consulted to find out what their priorities are, and these are worked into the Carers' Strategy, along with consideration of the national and regional priorities for Carers. All of the agencies who come into contact with Carers then commit to the Strategy with its Action Plan, working together to achieve these priorities.

Having an inter-agency Strategy and Action Plan helps partners work together in a joined-up way, to achieve what Carers really need. There is a quarterly Strategy Steering Group meeting of the various agencies and Carer representatives to ensure that the Strategy Action Plan remains on track. The updates are published on-line at <https://www.torbayandsouthdevon.nhs.uk/services/carers-service/strategy-policy-and-quality/>.

2. National Context

In the 21 years since our first Strategy was published, awareness about Carers, especially Young Carers has increased significantly. In 2014, the Care Act and Children and Families Act made the health and wellbeing of Carers a priority by law.

In 2019, the NHS published its Long-Term Plan with the following priorities for Carers.

1. GP Quality Markers for Carers
2. Identify and Support for Carers from Vulnerable Communities
3. Adoption of Carers' Passports
4. Information sharing
5. Contingency Planning
6. Supporting Young Carers

In January 2020, NICE published its guidelines for support to Carers of Adults, to be launched as Quality Standards in March 2021.

Obviously, in the last year, COVID has had a significant impact on Carers and caring. Carers UK estimated that COVID had increased unpaid caring by 50%¹, and that there was a significant impact on Carers' own mental health. Our own surveys of Torbay Carers in June 2020² and then again in the Carers Consultation at the end of 2020 show a deteriorating picture of Carers' wellbeing and increased concerns from Carers about their finances.

3. Local Picture

From the 2011 Census data, approximately 1 in 8 people in Torbay identified themselves as Carers. Yet we know that many people do not identify themselves as Carers, or do not identify their children as having a caring role in the family, so actual numbers are likely to be much higher. We expect the 2021 Census to show a greater proportion of Carers in Torbay's population.

In 2018, Carers Leads and Carers developed a Devon-wide Commitment to Carers, based on NHSE's 2014 Commitment to Carers and the Triangle of Care (treating Carers as expert partners in care). The seven principles are:

- 1: Identifying Carers and supporting them
- 2: Effective Support for Carers
- 3: Enabling Carers to make informed choices about their caring role
- 4: Staff awareness
- 5: Information-sharing
- 6: Respecting Carers as expert partners in care
- 7: Supporting Carers whose roles are changing or who are more vulnerable

Devon's main health and care organisations in the Sustainability and Transformation Partnership signed up to these principles in October 2019, with Torbay Council, Torbay and South Devon NHS Foundation Trust (TSDFT), Torbay Youth Trust, Devon Partnership Trust (DPT) and Compass House Medical Practices publishing their own commitments in late 2020. Immediate priority actions are included in the attached Strategy Action Plan, and as they complete these, their next priorities will be added to the live action plan.

4. Review of Torbay Carers Strategy 2018-2021

Despite COVID significantly affecting Carer Support during the last year, most of the 106 targets within the last 3-year strategy were achieved, demonstrating the commitment of all involved. The main summary is below, with detailed progress published at <https://www.torbayandsouthdevon.nhs.uk/services/carers-service/strategy-policy-and-quality/>

Identification of Carers

- The Commitments to Carers include this as a priority for each of the organisations mentioned above. There is also Memorandum of Understanding in place with the Fire Service.
- Almost all of Torbay's GP practices have completed their Carers' Quality Markers, and achieved their Carer identification target. However, although this has improved by 5% since the last consultation, doctor's surgeries still remain the place where Carers say that they could have been identified sooner.
- Hospital identification of Carers remained similar, which would be disappointing were it not for COVID meaning that for more than a year, only extremely limited Hospital visiting and hospital-based Carer Support has been permitted.
- Awareness campaigns have been undertaken with pharmacies, the Fire Service, the Ambulance Service, Community Helpline staff, Devon Partnership Trust and organisations that work with people from Black, Asian, Minority Ethnic, Refugee and Asylum Seeker backgrounds including Imagine Torbay Multi-cultural Group and Devon and Cornwall Chinese Association.

Information, advice and support

- We have maintained all existing Carers' Information and Support Services, and those that have been used have been well-rated by Carers.
- The Torbay Carers Together website was initiated, supporting smaller Carers organisations. It requires ongoing development.
- Before COVID, support in hospital had been expanded. This will be re-instated.
- Developing volunteer support to GP Carer Support Workers was not feasible due to the limitations on volunteers being able to access databases, and there was also insufficient capacity to undertake volunteering within the Lifestyles team.
- Despite the drop in Carers' Registrations due to COVID, there were more than 2,700 new applications between 2018 and 2021 compared to just under 2,000 during the previous three years. An extensive audit took place in 2019 which meant that the Register data was very accurate, enabling a very speedy response to data requests for Carers to receive COVID vaccination, especially as consent to share data with GP practices and other organisations is standardly requested.
- The audit also resulted in an increase from 1,500 to 2,800 Carers opting to receive Signposts newsletter electronically, further reducing costs.
- Partnership work with the voluntary sector continued, and a network of Carers allies meets regularly.
- Work started to support Carers from Black, Asian, Minority Ethnic, Refugee and Asylum Seeker backgrounds, with two 'Carer ambassadors' from these communities agreeing to identify and support people in their communities.
- Torbay's Carers received additional support during COVID, with excellent partnership working between Carers Services, the NHS, Torbay Council and Torbay's Community Helpline. Torbay Carers Services undertook 1151 welfare calls to Carers, initially prioritising older Carers – particularly those caring for someone with dementia or with a learning disability and who were identified as having no access to on-line support. Carers in Torbay received PPE supplies some six months before this was agreed nationally, plus lateral flow testing and access to enhanced adult Social Care Support.

Carers' assessment including whole family approach

- GP Carer Support Workers exceeded their target of 500 Health and Wellbeing Checks (HWBCs) each year.
- Carers' Aid Torbay continued to provide independent enabling and advocacy.
- Partly due to a change in recording processes, the annual Carers' Assessment target of 36% only reached 29% in 2018-19, but due to extensive work with Adult Social Care teams reached 40% in 2019-20, and is on target to achieve 36% in 2020-21 - particularly impressive given the impact of COVID.
- Parent Carer Needs Assessments by Children's Services, which had been a red-rated risk, started being undertaken in 2019-20, and numbers increased in 2020-21. There is ongoing work to improve parent Carers' access to support.
- There is also ongoing work required to ensure that Whole Family Working is properly embedded in all services.
- Dedicated support to families as children transition from Children's Services to Adult Services was introduced during this Strategy. The service was recently evaluated and Carers feedback is being used to support its further development.

Involvement of Carers in service delivery, evaluation and commissioning

- Carers are involved in all aspects of Torbay Carers Service including chairing the Carers Strategy Steering Group.
- Carers were involved with the commissioning of Torbay's Technology Enabled Care Service.
- More Carer Evaluators including Young Adult Carers have been recruited and have undertaken various evaluations including evaluation of the impact of COVID on Torbay's Carers, and additional projects such as providing hospital-based support in 2018 and 2019 and undertaking welfare calls to Carers during COVID.
- Due to capacity issues, peer support has not moved forward as much as we would like, so this will be addressed in the 2021-24 Strategy.

Enhanced support to the person being cared for

- A two-year Replacement Care project funded by the Better Care Fund developed the use of hospitality providers to give breaks to Carers. However, the final year was completely undermined by COVID. As lockdown lifts, breaks for Carers will be a really important step in their recovery.
- Children's Services review of Short Breaks Service is still to be completed.
- Technology support to Carers was set up and has been further enhanced during COVID.
- Buddying Carers who are IT-confident with those who are not was set up in 2019 and will continue to be further developed.
- 'Planning Ahead' support was included in the Age UK sitting service and continues to be promoted. There was insufficient ongoing funding for a partially-funded sitting service, but the need for replacement care remains an issue.

5. Formulation of Priorities for 2021-2024

The development of potential priorities for 2021-24 was based on Carer Consultation while taking account of national and local priorities, and evidence of what works well.

Healthwatch Torbay carried out a Carers' engagement exercise in late 2020, with almost 450 Carers responding. As this is only 1:10 of registered Carers, and due to the timing (during the second lockdown), the survey has been left open for Carers to complete whenever they are able, although their views are not included the final report. There was a much better rate of return of paper surveys compared with electronic surveys, so future engagement surveys will be posted to all. The full report can be seen at <https://www.torbayandsouthdevon.nhs.uk/uploads/carers-consultation-2021-2024-strategy.pdf> (**not yet uploaded)

6. Key Priorities for 2022-2024

1. Identification of Carers at the first opportunity.
2. Information, advice and support services available to all Carers.
3. Carers' Assessments proportionate to needs, including whole family approach
4. Involvement of Carers in service delivery, evaluation and commissioning.
5. Enhancement of support to person being cared for.

Within these priorities, there are a challenging number of targets with underlying themes of COVID-related recovery, supporting Carers with finance and employment-related issues, and improving the use of technology and digital equality for both Carers and the people for whom they care. Support will continue to be targeted at Carers in transition or who may have difficulty accessing support, in line with the Commitment to Carers.

In light of likely increased demand on Carers Services due to COVID, especially as lockdown is eased, it will be more important than ever to link into community-based, volunteer and peer support. Continuation of excellent partnership working is therefore essential.
