

Cumulative Impact Area (CIA) Crime Analysis

Notes on data

- Analysis was undertaken using crime data for 2009, 2010, 2013 and 2014 calendar years. Data was grouped for each 2 year period.
- Non notifiable offences of breaches and failures relating to the criminal justice system were excluded eg fail to surrender for bail.
- Crime volumes were similar for the 2 periods and the percent of crimes with no geographic reference (ie no Easting/Northing) was 6% for each period.
- Data with Eastings and Northings was mapped and the crimes in the exclusion zone were counted and are reported below.

Summary of total crime and blank GIS references

	Crimes	Blank GIS
2009&2010	21962	1337
2013&2014	21893	1273

Crime changes

- In 2009/2010 crimes in the CIA accounted for 17% of mappable crimes, in 2013/2014 it was similar at 16%.
- Overall crime in the CIA was 6% lower in 2013 and 2014 compared to 2009 & 2010, however there were some notable differences between offence groups.
- Of particular note is the level in violent crime, with violence 53% higher in 2013/2014. This was mainly due to an increase in violence without injury.
- Violence accounted for 29% of crime in the CIA compared to 18% in 2009/2010.

CIA crime by crime type

	2009-2010	2013-2014	Diff	% difference
