Grant Thornton events

- We held an Income Generation workshop in Exeter on 13 October 2016. The aim of these events is to bring together senior leaders from local government and the private and investment sectors to stimulate cross-sector debate and consider current and future funding models. The workshop was attended by your Head of Finance.
- We held a Faster Close and Highways Network Asset (HNA) workshop on 19 October 2016 in Exeter. This workshop was aimed at local authority practitioners and will consider the main factors for authorities to consider in accelerating their financial reporting procedures to produce their year-end accounts, and provided training on the latest developments in accounting for the HNA in 2016/17. The workshop was attended by members of Council's Finance team, and the Head of Finance did a joint presentation with your Audit Manager on how we worked together to achieve approval of the audited accounts by 31 July in 2015/16.
- Our Joint Venture Seminar was held in Taunton on 6 December 2016, which provided an insight into setting up and running JVs and was attended by 22 officers and members from Councils in the South West, including your Head of Finance.
- We held our own local government accounts workshops on 2016/17. Local events were held in Plymouth on 28 February and in Bristol on 1 March. Your Head of Finance and Finance Manager (Technical & Budgeting) attended the Plymouth workshop.

Grant Thornton

The income spectrum

Helping local authorities to achieve revenue and strategic objectives to create a vibrant economies

Grant Thornton market insight

Income generation is increasingly an essential part of the solution to providing sustainable local services, alongside managing demand reduction and cost efficiency. Our report gives local authorities the tools needed to maximise their ability to do so.

Our new research on income generation which includes our CFO Insights too suggests that:

- councils are increasingly using income generation to diversify their funding base, and are commercialising in a variety of ways. This ranges from fees and charges (household garden waste, car parking, private use of public spaces), asset management (utilities, personnel, advertising, wifi concession license) and company spin-offs (housing, energy, local challenger banks), through to treasury investments (real estate development, solar farms, equity investment).
- the ideal scenario to commercialise is investing to earn with a financial and social return. Councils are now striving to generate income in way which achieves multiple strategic outcomes for the same spend; examining options to balance budgets while simultaneously boosting growth, supporting vulnerable communities and protecting the environment.
- stronger commercialisation offers real potential for councils to meet revenue and strategic challenges for 2020 onwards. Whilst there are examples of good practice and innovation, this opportunity is not being fully exploited across the sector due to an absence of a holistic and integrated approach to corporate strategy development (a common vision for success, understanding current performance, selecting appropriate new opportunities, the capacity and culture to deliver change).

To support local authorities as they develop income generation strategies, the report provides:

- case study examples
- local authority spend analysis
- examples of innovative financial mechanisms
- critical success factors to consider

The Board: creating and protecting value

Our new cross sector Board Effectiveness Report

In all sectors, boards are increasingly coming under pressure from both the market and regulators in terms of effectiveness and accountability. Building on the success of our cross sector audit committee effectiveness survey- Knowing The Ropes, the Grant Thornton Governance Institute extended its research to look at the effectiveness of boards across the corporate, public and not for profit sectors.

This report raise key questions that all boards should ask themselves to challenge their effectiveness. Their organisations may operate in different sectors and be subject to a variety of statutory and governance requirements, but they all share a common overriding principle: the governing body is a collective charged with developing the organisation's purpose.

Key messages:

- There is a strong future focus on boards
- Executive behaviours tend to dominate - not the best scenario for good governance or an organisation's future focus
- There are strongly held opinions about the relationship between the board and the executive which will impact on efficiency
- More than 88% of respondents see their executives as being strong leaders of the organisation
- There is a clear focus on organisational culture and values across all sectors – 93% see the executive board members modelling the values of the organisation
- Non-executives also need to live and breathe those values – only 82% of respondents agreed that the non-executives inspire and guide the executive to realise the organisation's purpose
- Only 75% of respondents feel that the recruitment process of non-executives is rigorous, well-documented or transparent
- Over 60% of board members believe that are adequate processes in place to evaluate performance

This report uses the DLMA analysis which categorises skills into four areas: Directorship, Leadership, Management and Assurance. This framework allows organisations to have a better understanding about where they are focusing their energies.
