Subject: Paignton and Brixham Peninsula Neighbourhood Plan consultation response

Reference Paignton and Brixham Peninsula Neighbourhood Plans'

Thank you for including the MMO in your recent consultation submission.

We believe that the document has been prepared to a high standard, but we would like some additional references to the MMO as the marine planning authority for England, the Marine Policy Statement and the emerging South Marine Plans.

The Marine Management Organisation (MMO) is a non-departmental public body responsible for the management of England's marine area on behalf of the UK government. The MMO's delivery functions are; marine planning, marine licensing, wildlife licensing and enforcement, marine protected area management, marine emergencies, fisheries management and issuing European grants.

Please also consider the following information as the MMO's formal response.

Kind regards,

The Marine Management Organisation

Marine Licensing

Activities taking place below the mean high water mark may require a [marine licence](#) in accordance with the [Marine and Coastal Access Act \(MCAA\) 2009](#). Such activities include the construction, alteration or improvement of any works, dredging, or a deposit or removal of a substance or object below the mean high water springs mark or in any tidal river to the extent of the tidal influence. You can also apply to the MMO for consent under the Electricity Act 1989 (as amended) for offshore generating stations between 1 and 100 megawatts in England and parts of Wales. The MMO is also the authority responsible for processing and determining harbour orders in England, and for some ports in Wales, and for granting consent under various local Acts and orders regarding harbours. A wildlife licence is also required for activities that that would affect a UK or European protected marine species.

Marine Planning

As the marine planning authority for England the MMO is responsible for preparing marine plans for English inshore and offshore waters. At its landward extent, a marine plan will apply up to the mean high water springs mark, which includes the tidal extent of any rivers. As marine plan boundaries extend up to the level of the mean high water spring tides mark, there will be an overlap with terrestrial plans which generally extend to the mean low water springs mark. Marine plans will inform and guide decision makers on development in marine and coastal areas. On 2 April 2014 the [East Inshore and Offshore marine plans](#) were published, becoming a material consideration for public authorities with decision making functions. The East Inshore and East Offshore Marine Plans cover the coast and seas from Flamborough Head to Felixstowe. For further information on how to apply the East Inshore and Offshore Plans please visit our [Marine Information System](#). The MMO is currently in the process of developing marine plans for the South Inshore and Offshore Plan Areas and has a requirement to develop plans for the remaining 7 marine plan areas by 2021.

Planning documents for areas with a coastal influence may wish to make reference to the MMO's licensing requirements and any relevant marine plans to ensure that necessary regulations are adhered to. For marine and coastal areas where a marine plan is not currently in place, we advise local authorities to refer to the [Marine Policy Statement](#) for guidance on any planning activity that

includes a section of coastline or tidal river. All public authorities taking authorisation or enforcement decisions that affect or might affect the UK marine area must do so in accordance with the [Marine and Coastal Access Act](#) and the UK Marine Policy Statement unless relevant considerations indicate otherwise. Local authorities may also wish to refer to our [online guidance](#) and the [Planning Advisory Service soundness self-assessment checklist](#).

If you wish to contact the MMO regarding our response please email us at consultations@marinemanagement.org.uk or telephone us on 0300 123 1032.
