26<sup>th</sup> November 2017.

RE: COMMUNITY GREEN SPACES.

Dear Sir/Madam.

Further to the meeting on the 20<sup>th</sup> November 2017 regarding the 7 designated local green spaces that the Torbay Development Agency has objected to.

With the projected increase in the population of this area it is imperative that all current green open spaces are protected for all current and future generations.

These pockets of local green spaces do provide people with a haven of recreation locally to where they live and enhances everyone's quality of life.

The Clennon valley area is a true asset to the already over-developed Torbay area, although a large part of it has been diminished by the development of the Velo-Park which has hardly been a wonderful success story.

The Clennon valley is used by great numbers of people throughout the Bay and extended areas for sports clubs, schools, holiday makers and local people. It provides an area for both recreation, sport and leisure time to the benefit of visitors and residents alike.

To consider the possible loss of such an asset for the future generations would be extreme folly and so should remain protected for the benefit and well-being of all concerned.

Yours faithfully
