Dear Sirs,

15.12.2017

The Hookhills Community Green, is exactly that, and is used by children in the play area, and the Community as a whole. It is situated in an already compact residential area and offers a safe outdoor environment for the local community.

It is situated next door to the Hookhills Social Club, a well managed family orientated club, much valued by the local community. Indeed, the Community Green is an added attraction to hold fund raising events, and only this year was used to stage the annual Cherry Pie Fayre which was a huge success, well supported and attended by the local Hookhills Community and beyond. Local people gave their time and commitment to make this event the success it was, raising significant funds to support local charities. It is the intention to hold this annual event in future,

It is my belief that this little local park should be designated a "green area", and safeguarded against any future development, to the benefit of the local community and surrounding area. We do not support the objections raised by counsellors and the Torbay Development Agency.

Yours faithfully

B
